Weaving industry at Sualkuchi

Saulkuchi is a village in Kamrup district located on the north bank of the mighty river Brahmaputra. In the context of silk weaving, Saulkuchi is a name that stands apart. Saulkuchi is a weaving village that produces the best silk in the state. The Muga silk and Pat silk along with Eri silk from this region is famous for its quality not only in the state but also in most of the parts of India. The weaving tradition here can be traced to the 11th Century when king Dharma Pal dynasty sponsored the craft and bought 26 weaving families from Tantikuchi to Saulkuchi. The village took shape as a weaving village when the Shams occupied Saulkuchi defeating the Mughals in the mid of 17th Century. There are about 17,000 silk looms presently working in Saulkuchi. Most of the Saulkuchi's silk is woven into mekhela-chadar and gamosas which have high demand throughout the country and abroad. Saulkuchi is known as the Manchester of the East.

Foreword

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st.phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th. July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts

driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i)-Status and Growth History of Towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Prateek Hajela, IAS, Director of Census Operation, Assam. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division**.** I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)
Registrar General &
Census Commissioner, India

New Delhi.

Preface

The District Census Handbook (DCHB) was first introduced in 1951 Census. This is a publication containing both Census and Non-Census data. The DCHB is a publication where data is sourced both from State Government as well as from the office of the Directorate of Census Operations.

In a DCHB, district wise data at village and town/ Ward level is presented at Community Development Blockwise. In DCHBs of earlier Censuses only Primary Census Abstract data was presented alongside the Village directory/Town Directory data. However, during 2011 Census it was decided to bring out two publications of DCHB as Part A and Part B for each district. The Part A will contain various inset tables based on Village Directory/Town Directory data , Part B shall comprise mainly of Census data pertaining to Primary Census Abstract (Rural & Urban) as well as Houselisting data arranged CD Block wise for each district. This is the first time that the DCHB is coming up with the Houselisting data in its publication.

The main purpose of DCHB is to disseminate data upto the lowest administrative level of villages in rural areas and wards in urban areas to facililate micro level planning and development at the grassroots.

The Census Operation in Assam was conducted under the able guidance and supervision of Shri R.K.Das, IAS. I had assumed office as the Director of Census Operations in February, 2014 and by this time collection and compilation of Village and Town Directory schedules for the 26395 villages and 214 towns, including 126 Census Towns had painstakingly been completed. An important aspect of this publication of DCHB is that unlike other Census publications where villages are presented only Revenue Circle wise, this publication of the handbook is presenting villages CD Blockwise. For this purpose, the information on CD Blocks was collected from Panchayat and Rural Department of the state Government to arrange the villages accordingly.

The work of collection of Village and Town Directory schedules was done under the supervision of Dr.D.K.Dey, Joint Director and Sri G.R.Saikia, Deputy Director. However, after transfer of Dr. Dey from DCO, Assam, Smt Bharati Chanda supervised the work of compilation, validation and finalization of Village and Town Directory data. Smt Nijora Sharma, Asst. Director guided and co-ordinated the entire staff engaged in the various aspects relating to compilation of the DCHB. Shri J.Ghosh, Sr.Supervisor greatly helped in cross checking and validation of the entire data. Smt. Salma Sahin Laskar, SI-II and Shri Satadal Dutta, DEO also have contributed significantly in bringing out this publication of DCHB by meticulously scrutinizing the data and preparing the manuscripts.

I would like to thank Shri O.M.Singh, Research Officer (Map) and his dedicated team of the Map section for preparing the maps presented in the DCHB.

I am grateful to Dr.C.Chandramouli, IAS Registrar General & Census Commissioner of India for his valuable guidance and his constant encouragement to complete the work within the time frame. I would also like to specially thank Shri A.K.Arora, Joint Director, D.P.Division and his team for their constant technical guidance and co-operation.

Guwahati

HISTORY AND SCOPE OF THE DISTRITCT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i)-Status and Growth History of towns,(ii)-Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)-Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief History of the district

Kamrup named after Kamarupa, a name by which Assam was previously known in ancient times. The district was originally comprised with parts of present Kamrup (M), Barpeta, Nalbari and Baksa district which got subsequently bifurcated into different independent districts.The district is now a small area in the western part of Assam, with a distinctive native Kamrupi culture and dialect. The distinctive dialect etc. are however, shared with the present administrative districts of Nalbari and Barpeta, these districts being part of an un-divided Kamrup before the 1980s. Assam has been referred to as Kamrup in many of the ancient Indian literature. It was also known as Pragjyotishpur due to the astrology (Jyotish Shashtra) practices that prevailed in this part of the country during that time. However, "Kamrup" became a more predominant name in the later part of the history. Today Kamrup is an administrative district of Assam with its headquarters located at Amingaon. The greater parts of the district consist of wide plains, through the lower portion of which the river Brahmaputra flow a steady course from east to west. The District is bounded by Udalguri and Baska District in the north, Meghalaya state in the south, Darrang District and Kamrup Metropolitan District in the east and Goalpara, Barpeta and Nalbari District in the west.

Kalika Purana and Yogini Tantra, two important Puranas believed to have been written in the tenth century, mention several kings of Assam. One of the most famous kings of Assam was Narakasur who founded the ancient city of "Eastern Astrology". It is stated in Kalika Purana that the place where Brahma first had created all stars and planets is called Pragjyotishpur which was equal to Amorawati, the city of Indra. In medieval times or in puranic age Pragjyotish the old name of Assam was changed to Kamrupa. Narak established his capital at Pragjyotishpur, the Guwahati of to-day. He was a very powerful kind of that time. The interesting legend that associated with him says that he desired to marry the Goddess Kamakhya. The Goddess gave her consent lying on some conditions that he would have to construct a temple for her, a road and a tank in a single night. The king accepted the challenge and was about to complete his task. The goddess Kamakhya seeing the danger of her made a cock crow before usual hour. Narak killed the cock at a place about 10 kms. from Guwahati and since then that place is known as Kukurakata. Narak's name is also remembered as one of the protectors of Kamakhya and the builder of the causeway up the southern face of the hill Nilachal on which the temple of Kamakhya stands. The name of the place Pragjyotishpur was changed to Kamrupa. There was also a legend. The story goes that the God of love was burnt to ashes by the fiery glance of lord Siva (Mahadev) and Kamdev has regained his life at the supplication of his wife Ratidevi. As a consequence, the place goes by the name Kamrupa. The Chinese pilgrim Hiuen-T-Sang in the 17th century had mentioned the name of this place as Ka-mo-lu-pa. According to him the area of the kingdom Kamrupa was 8375 li (1675 miles or 2650 kms.) and the amplitude for Kamrupa was 30 li (5 miles or 8 kms.). It required two months time for a traveler to make a jaunt from the capital to the end of the verge of the kingdom. Till the end of the rule of Koch king Naranarayana , the name of his kingdom was Kamrup. In the absence of valid and authentic records it is not easy to mention how long Pragjyotishpur or modern Guwahati has gone on to be the capital of the kingdom.

Probably, after the death of Bhaskar Varman, the capital of Kamrup was transferred to Harappeswar or Hatappeswar by Salastambha which is identified as modern Tezpur. Brahmapal had transferred the capital at the end of the tenth century again to the Pragjyotishpur or its nearby place. Ratnapal son of Brahamapal, after fortifying this city for favour of his dynasty has named the capital of his kingdom 'Shri Durjaya". Late K.L. Baruah in his book – "Early history of Kamrup" has pointed out to be this place in and around old Pragjyotishpur. At the end of the eleventh century, the capital of king Indrapal was Kamrupnagar at Kamata. Some are of the view that it might be either at Guwahati or near to North Guwahati. It is beyond doubt that the same place was called Pragjyotishpur in ancient time and Kamrup in medieval time and in most of the time, capital was at Guwahati or somewhere thereabout. From the past history or legend it is categorically said that old Pragjyotishpur is the present modern Guwahati city of Kamrup district.

The centuries did not leave much recorded history. Some copper plates of the eleventh century show that Narak was displaced by Salastambha, a Mecha or foreign conqueror whose line ended in the person of Sri Harsha. Sriharsha was succeeded by his son, Ratna pala who in turn was succeeded by his son, Indra pala. Since then, the history of the Pala kings remained in dark. After the end of Palas dynasty, the Koch dynasty started by the king Viswa Singha. He founded a beautiful city in Cooch Behar. He visited Nilachal where he was shown a mound. He offered prayers and he had the mound explored and thereafter the ruins of an old temple were discovered. A new temple was then constructed there. He was succeeded by his son Malla Deva in 1534 A.D. He assumed the name of Nara

Narayan. He overpowered the Ahom king, the Kachari Raja and the Raja of Manipur. He turned the kings of Jaintia, Tripura and Sylhet. The Koch kings were later on defeated by the Muslim Subedar of Bengal and Guwahati became the capital of the Muslim Governor. In 1658, the Ahom Raja Joydhwaj Singh took advantage of the disputes amongst the claimants to the throne of Shah Jahan, marched down the valley of Brahmaputra and drove the Muslim and his former allies, the Kochs, alike before him. In 1662, Mirjumla the Subedar of Bengal drove away Ahoms from Kamrup and captured Guwahati. Mohammedan Fouzdar was posted there. After departure of the Muslims, Guwahati was occupied by Gadadhar Singh in 1681 A.D. From this time onward, Kamrup became part of the Ahom territories and was administered by a Viceroy stationed at Guwahati.

The Ahoms were a Shan tribe from the kingdom of Pong in the upper valley of the Irrawaddly who at the beginning of the 13th century A.D., crossed the Patkai and settled in Sibsagar and Lakhimpur districts of Assam. At the beginning of the 17th century, the Ahom began to intervene in Lower Assam.

Gadadhar Singha was the first king to annex Kamrup to the Ahom territories. He was succeeded by Rudra Singha in 1695 A.D. when he died at Guwahati in 1714 A.D., his son constructed the Rudreswar Temple in the memory of his father. From the middle of the 18th century, the Ahom power began to decline. Lakshmi Singha's reign from 1769-1780 was signalised by the out break of the Moamaria insurrection. He was then succeeded by Gauri Nath Singha in 1780 in whose reign the Moamaria insurrection broke out with increased violence. When Gauri Nath died in 1795, he was succeeded by his son, Kamaleswar Singha in whose reign the Daflas made an in road on the Ahom territories and put them in great disorder. He was succeeded by his brother, Chandra Kanta Singha in 1809. He was deposed in 1816 and Purandar Singha was appointed in his stead. He was reinstated by the Burmese whom he has appealed for help. They soon made it clear that they intend to retain their hold in Assam. Under the Burmese's oppression and tyranny, Chandra Kanta Singha fled to Goalpara and he tried to recover his lost kingdom. In the mean time, however, causes of quarrel arose between the British and the Burmese and in 1824 war were declared by the British Government and a force was sent up the valley of Brahmaputra. The Burmese evacuated Guwahati without striking a blow under the Treaty of Yandaboo, 1826. Assam was finally brought under the East India Company. The next historical event with which Kamrup is connected was the Bhutan War of 1864 which resulted in the occupation of Dewangiri. The subsequent history of the district is uneventful.

District Administration:

The Deputy Commissioner of the District is the overall in charge of the administration of the entire district. He also acts as the Collector in case of Revenue matters, as a District Magistrate in case of maintenance of Law and Order and General Administration, as a District Election Officer in case of conduct of Election, as a Principal Census Officer while conducting Census, and so on. A number of Officers, like Additional Deputy Commissioners, Sub-divisional Officers, Extra Assistant Commissioners and others assist the Deputy Commissioner is looking after the administration of the district. At lower level each sub-division is headed by one Sub-Divisional Officer whereas under him there will be Revenue Circle Officers for each revenue circles who are responsible for the entire administration of the area under their respective revenue circle.

Kamrup district is situated in the Brahmaputra valley region of Assam. The Kamrup district has undergone jurisdictional changes during the last decade. At present, Kamrup district consists of two sub-divisions. They are namely Guwahati Sub-division and Rangia sub-division. The Kamrup district comprises 12 revenue Circles with 1068 villages. It has 14 Community Development Blocks within the district. The total area in the district is 3105 Sq.Km(Rural: 3031.46 Sq.Km and Urban: 73.54 Sq.Km). The rank of the district in comparison to other districts in term of area in the state of Assam is 11. At Kamrup district, there are 2 are Statutory Towns: Rangia (MB) and Palasbari (MB) and 14 Census Towns. After 2001 Census, 323 villages were carved out from the district for the inclusion to the newly created districts Baksa (100 villages) and Kamrup Metro (223 villages).

****

ANALYTICAL NOTE

(I) Physical feature:

Kamrup district is an administrative district in the state of Assam .The erstwhile Kamrup district bifurcated into two parts in the year 2003; other being Kamrup Metropolitan district.A part of Kamrup district was also cut to form part of the newly created Baksa district of BTAD. The district, along with Nalbari and Barpeta together formed the Kamrup region of yore having the Kamrupi culture and language. Kamrup District is situated between 25.46 and 26.49 North Latitude and between 90.48 & 91.50 East Longitude. The district is bounded in the east by Darrang and Kamrup(M) districts, in the north by Baksa district, in the West by Nalbari, Barpeta and Goalpara districts and in the south by the state of Meghalaya. The district covers an area of 1068 sq. Kms. In terms of area, the district occupies the 11th rank among the district of the state.

Physiography:

The mighy river Brahmaputra bifurcates the district into nearly equal parts. The river thus have a a lot of influence in the physiogrphy of the entire district.In the immediate neighborhood of the Brahmaputra the land is low, and exposed to annual inundation. In this marshy tract reeds and canes flourish luxuriantly, and the only cultivation is that of rice. At a comparatively short distance from the river banks the ground begins to rise in undulating knolls towards the mountains of Bhutan on the north, and towards the Khasi hills on the south. The hills south of the Brahmaputra in some parts reach the height of 800 feet (240 m). The Brahmaputra is navigable by river steamers throughout the year, and receives several tributaries navigable by large native boats in the rainy season. The chief of these are the Manas, Chaul Khoya and Barnadi on the north, and the Kulsi and Dibru on the south bank.

Geologically, the hills are for the most part formed of gneissic rocks from which excellent building stone can be obtained. The plain is of alluvial origin and consists of sand and clay in varying proportions, ranging from pure sand near the banks of the Brahmaputra to a blue stiff clay, utterly unfit for cultivation. Surface lime was discovered over a small area at the foot of the Bhutan Hills. The hills are represented by a group of Siwalik sediments consisting of clays, sand stones and grits conglomerated with pieces of fossil wood and lignite's.

Drainage:

The Kamrup district is intersected by numerous rivers and streams all of which come from the hills and mountains and flows into the Brahmaputra which is a gigantic river. The river runs through the Assam Valley and it absorbs waters of all the rivers and streams. In summer, the river looks like an island lake in its wide expanses but in winter the river and its channels zigzag in sandy stretches. At Guwahati, the river is confined between rocks and hills on either side making it comparatively narrow but even here the breadth of the river is over one kilometer. The river spreads itself during the rains and distance from one bank to the other is very great. The important tributaries are Puthimari, Bornoi, Nona, Kulsi, Pagladiya, Kalajaetc. The whole drainage of the district ultimately finds its way to all rivers and tributaries. The rivers and its tributaries are only drains to flash out the water from the district. However, in rainy season, the rain waters are deposited in all rivers, beels and plain land. So the water remains for a few months in a stand still way. Whenever water level comes down in the rivers, the water of plain areas goes out through rivers and its tributaries. The natural drainage is the only system for the district. However, in the towns, modern drainage systems have been introduced to flash out the water.

Flood:

The floods which are so frequent in the Brahmaputra cause tremendous changes in the river course and raise the rivers beds by depositing sediment carried from the upper reaches. This is a common feature of floods in big rivers. The miseries caused by the Brahmaputra and its tributaries are so much so that it needs no description in detail. However, villages situated on the river banks are sub-merged, paddy fields are turned into vast sheets of water, standing crops are destroyed, cattle are swept away and hundred of

cultivators, fishermen and other people living in these areas are rendered homeless. All important links of communications are snapped and life hinges on the relief provided by the government and public. After the flood, people generally suffer from epidemics. The untold miseries spread all over the areas. Due to flood many paddy fields become unfit for cultivation for spread of sand.

Climate:

The climate of Kamrup does not differ from that of the other districts of Assam. Its principal characteristics are a cold and foggy winter, a moderately hot spring and a temperately hot but humid summer. In March and April, the weather begins to grow a little warmer. During the height of the rains, the climate is decidedly oppressive. The air is absolutely saturated with moisture and the damp heat is very trying indeed. Climatically from February to May, the weather is dry and moisture less and the heat is gentle; from June to October, there is enough rain and moisture and the heat is very unbearable and from November to January, the climate is cold and foggy. During the later part of December and early part of January, the Brahmaputra fog can be very cold while in March, the wild wind carrying the Brahmaputra sand can be seen everywhere.

From the end of February, the mercury level gradually goes up and in July, August and September the temperature reaches the maximum point. During these months, the mean maximum temperature does not generally come down below 31 degrees centigrade and even sometimes it goes to above 40 degree centigrade. These months are treated as hottest months for the district in each year.

Rainfall:

Most of the rainfall occurs in Kamrup district during the monsoon, i.e. from June to October each year, while during the other months of the year some rainfall also occurs due to the north western winds. The monsoon brings with it a big amount of humidity which makes the climate very oppressive although the real temperature may not be so high. As per Statistical Handbook, 2012 the average monthly rainfall was highest in the month of July with 373.4 m.m. The lowest rainfall recorded was 0.3m.m. in October.

Soil:

The soil of Kamrup district is not much different from those of the other district of Assam. The district is characterised by an abundance of marshes and low lands, the soils of which contain a large percentage of organic matter. Kamrup is an important crop region of the valley. The agriculture in the rainy season is mainly confined to the high lands which are free from water-logging. In winter the soils are excellent for growing crops like pulses and oil seeds. The soils in Kamrup district are generally fertile due to annual deposing of silt. A major portion of total sown area of this district is under rice and tea.

Forest:

The forest plays a pivotal role in the economy of the people of the district. A large section of the people of the district rests on forest for firewood to cook their meal and timber, bamboo, ikra, thatch etc. to build their houses. The forests of the district are the principal raw materials supplier to saw mills and factories. The forests are generally ever-green in type and consist of a host of tree species. The important trees from the commercial point of view are sal, sundis, tik, champa, Gamari, san, nageswar, jam, bunsum, kokoi, simul, mangoes etc.

Mineral and Mining:

Not all the natural resources are located on or above the earth's surface. Many of the resources are hdden deep below the earth on which human bein lines. They are buried deep even under river and sea eds. In the modern industrial era these undr-ground resources are of great importance. Much of the industrial growth depends upon these mineral resources.

Kamrup district is not rich in minerals deposits or mines. So far, no exploration of minerals has been done n the district. Quartz-magnetic rocks have been reported from near Hahim in Kamrup district. Potters clay is found almost everywhere and espcially in the alluvial tracts. The China clay is found in good quantities in some of the rivers of Kamrup district.

Lamd and land-use pattern:

Land resource is one the most important and valuable free gift of the nature and its proper utilization by the inhabitants is of great value. Land should be fully used as per its capability. Lack of proper or profitable use means wastage of land resource and it results loss of productivity. It therefore requires proper and timely use of this kind of asset

The following table indicates the pattern of land use under various classification of land in Kamrup district

Table-I
Land use Pattern in Kamrup District, 2010-2011

Sl. No.	Land put to different uses	Area in hectares
1	Total Geographical area	308684
2	Forest area	70885
3	Land not available for cultivation	31671
a	Land put to non-agricultural uses	21661
b	Barren and un-cultural land	10010
4	Other non-cultivated land excluding fallow land	27742
a	Permanent pastures and other grazing land	12305
b	Land under misc, trees, groves etc. not included in net area	12212
c	Cultivable waste land	3225
5	Fallow land	1132
a	Fallow other than current fallow	582
b	Current fallow	550
6	Net area sown	177254
7	Total cropped area	181015
8	Area sown more than once	3761

Source: Statistical Handbook,2012

Agriculture and plantation:

The Economy of the district is mainly agricultural. The alluvial soil of the district is fertile and suitable for agricultural production. The district is self-sufficient in food grains. However, due to increasing population, a great strain on the districts food resources is being noticed. The emphasis was laid on various schemes in Five year plans for increased agricultural production. A beginning was also made for building an infra-structure for the training of agriculturists in modern methods.

Crops:

The staple food of this district is rice. The alluvial soil, humid atmosphere and enough rains are favourable for growing agricultural crops in the district. The important crops which are being grown are rice, mustard, pulse, cereals, wheat and tea. Jute is also grown in the district. Lahi rice is grown in high fields which is an important production of the district. The Joha is the finest variety of rice commonly grown in the district. Boradhan is also produced particularly to prepare chira and pitha (cake). Ahu and Bao are other varieties of rice grown in the district. Wheat is also gaining popularity and is supplementing rice in diet. Wheat is cultivated as a rabi crops. The varieties are Sonalika and Kalyan Sona. Rape and mustard are often grown alongwith Ahu rice. Pulses like Mati Kalai, Masur, Mug are also grown in the area. Arhar is also another pulse grown in the district.

The vegetables of different kinds are grown in the district. The most common of them are cauliflower, cabbage, brinjal, lady's finger, pumpkin, tomatoes, peas, radish, turnip etc. These vegetables are mostly grown in rural areas and are exported to the commercial centres of the district and also to other districts of the state.

Table-II
Area and Production of important crops in Kamrup district for the year 2011-2012

Sl. No.	Types of Crop	Area under cultivation (hectare)	Production (Tones)
1	2	3	4

Flood, rainfall, types of soil and climate are the main factors responsible for better production of agricultural in the district. The district has different types of soils which offer great potentialities for growing various kinds of vegetables and other cash crops.

Horticultural Crops

The district is not very much important for growing fruits. Only a few kinds of fruits are growing in the district. An important garden crop of the district is the plantain known as 'Kal' in Assam. The various types of bananas are grown in the district. There are Cheni Champa, Malbhog, Athia, Porakal (Kachkal), Manohar, Jahaji etc. Porakal is used as vegetable. It is used in curry. The banana tree is more important tree because the whole plant from leaf to root is used for different purposes. Mangoes, Jack fruits, Lemons, areca nuts, coconuts etc. are also common production of the district.

Table- III
Area and Production of Horticulture crops in Kamrup district, 2011-2012

Irrigation:

Kamrup district receives heavy rainfall during the monsoon season. The wettest months of the year are May, June and July and more than 60% of the total annual rainfall is measured in these three months. The agriculturists depend mainly on rain water for their cultivation. Agriculture suffers loss in the year of heavy rains due to flood and fails in the year of drought. In time of drought cultivators are compelled to irrigate their agricultural fields by digging canals from various streams and rivers. Indigenous way of irrigation is still prevailing in the district. The channels, ponds are erected to water the agricultural fields. Some minor irrigation projects are installed in the district by constructing bunds across the streams and rivulets, drainage channels and silt channels to obtain silt deposits in low lying areas. Lift irrigation with electric pump has also been used in some parts of the district.

In the district, wells, ponds and tube wells are the main sources of irrigation. Tube wells and wells are confined to the plain areas of the district. Under various plans and programmes, the State Government has taken up various small and medium irrigation schemes in the district.

Table-IV
Irrigation potential utilised andtargets and additional potential created in Kamrup district during 2011-12(Cumulative)

Animal Husbandry:

After Agriculture, Animal Husbandry contribute maximum to the stock of gross domestic products in the state. Livestock is the main wealth next to agriculture of a large chunk of rural population. Livestock plays an important role in the State's economy which is primarily agrarian. Agriculture economy is supplemented by Animal Husbandry. Agriculture production depends very much on the livestock available. Agriculture is viable if adequate animal stock is there to feed it by way of manure etc. These activities allied to agriculture have significant role in supplementing the income of farmers.

Various kinds of livestock are available in the district. Cattle and goats are the main animals for most of the families of the district. Moreover, buffaloes, sheep, horses, pigs, fowls and ducks are also available. People generally graze their animals on the rice field after harvest of crops. In the night the animals are kept in sheds by the owners .The animals are given paddy straw for food which are kept in the courtyard. Besides, there are village grazing reserves where the villagers graze their domestic animals.

For the development of livestock, emphasis has been laid on the cultivation of fodder crops to provide them with nutritious diet. Roots and seeds of improved grasses are freely distributed to the farmers from the government farms. The department of Animal Husbandry and Veterinary has been constantly helping the farmers for their animals. In order to improve the breed cattle, measures have been adopted by the above department time to time. Contagious and infectious diseases are also prevalent among livestock in the district. To protect animals from various diseases preventive measures are taken by the department.

Table-V
Livestock and Poultry in Kamrup district as on 2007

Sl.No.	Livestock and Poultry	Nos.

Sericulture:

Sericulture is one of the age-old part-time occupations of the rural people during their agricultural off season. Time has changed the situation. The importance of handwoven pat, muga and eri cloths is gaining popularity day by day among the people of the state as well as outside the state. Hence it does not remain as a part-time occupation for the people today. Silk industry in Assam has flourished since time immemorial. The art of sericulture and rearing of cocoons for manufacture of various silk cloths were known to the Assamese as early as the Ramayan and the days of Arthasastra.

Three principal varieties of silk namely Pat, Eri and Muga are still produced in Assam. The first variety is the finest and costliest. Eri is of coarser quality and is generally used by common people. Muga is stouter and mora durable than any other cloths. The Pat, Muga and Eri are being produced by the people of Kamrup district. The State government and the Central silk Board have taken various measures for the development of sericulture in Assam to increase the production of seed cocoons as well as the quality of yarn.

Following table gives the picture of families engaged in silk production and total areas covered.

Table- VI
Sericulture Activities in the District, 2011-12

Type	No. of Families Engaged	Total Area under Silk Worm Food Plants (in Hect)	No.of Sericulture villages
Eri	9829	424.13	551

Handloom and Textiles:

Weaving is one of the most common traditional industry in Assam. Weaving in Assam has its own intrinsic and distinct characteristics. The products which are generally used only on auspicious occasions are delicately weaved with various designs, colours and beauty. The artistic skills of the weavers depict on the products produced by the weavers.

However, in the recent past the government is striving hard not only to save and preserve the weaving industry but also to develop this sector through several schemes and programmes. For skill development and to assist and promote the existing weaving units the government has opened several centres in the district

Fishery:

Pisciculture is becoming popular among all sections of the people irrespective of caste and creed. The utility of fish has increased manifold due to presence of protein contents in its. Fisheries in Assam are of various types. These are beel, river, swamp, forest derelict and semi-derelict, pond and tank fisheries. Beel and river fisheries can be either registered or unregistered. Besides, there are good number of private tanks, marshy areas, dead rivers and canals where pisciculture is done. Various kinds of fish are found in beels and rivers of the district. The bigger type of fish generally found in the beels are Rou, Barali, Chital, Kalia, Jora, Sol etc. Among the smaller varieties, Kawai, Magur, Puthi, Mowa, Shigara etc. are very common.

In order to develop pisciculture in the district, a number of Fish Seed Farming Centres were established in the district by the government. Various assistances to pisciculturists for reclamation and inputs were supplied. To help fishermen, a National Welfare Fund was also set up in the district.

Industries:

In ancient time, proper overland communication system was not developed and scope for external trade was not developed and scope for external trade was very much limited. But with change of time, the situation has gradually improved. A considerable amount of retail/wholesale business was done in the local market. Jute, paddy, rice, timber, oilseeds, cotton, vegetables are important products that are exported in and outside the district. Middle men and business men purchase the village product and sell to the wholesale merchant. Kamrup district comprising of newly created Kamrup (M) was considered as the most industrialized district of Assam. Guwahati city was the biggest industrial as well as commercial centre of entire north eastern region. The Oil Refinery is located at Noonmati, Guwahati. The Industrial Estate was also started in the city.

The list of some important registered factories and workers in Kamrup including Kamrup (M) by type of industry as mentioned in the Statistical Handbook Assam, 2012 is furnished below. No separate data is available for Kamrup district sweperately.

Table-IX
Types of Industry

Tea garden in Kamrup district:

Tea is also considered one of the most important items of State's economy and provides employment to a large number of people. The process of cultivation and manufacturing of tea are the same as practised in the other districts of Assam. As per Statistical Handbook, 2012, in Kamrup district in 2010, 3460 hectares of land is under tea cultivation and production is 4813kg. Out of 5053 Small tea growers in Assam, 8 are in Kamrup district including Kamrup (M) and 30.55 hectares of land are registered area under tea cultivation upto 18.06.2012.

Trade and Commerce:

Prior to industrialization of the district, Kamrup district was a great centre of trading. With the increase in the industrialization of the district, the activities in trading and commerce have increased very rapidly. Guwahati of the present newly created Kamrup(M) district was the principal centre of trade and commerce. The other centres of trade and commerce of the district are Rangia, Baihata chariali, Boko, Chaygaon, Sualkuchi, Darangamela etc. The main items of export of the district are bales of jute, tea in chests, rice, timber, endi, silk and muga cloth. The articles generally imported to the district are cotton cloth and yarns, woolen cloth and yarn, mustard oil, mustard seeds, groundnut, lin-seeds, wheat, pulses, sugar, salt, medicine, fish, leather goods, iron material, cement, vehicles and their accessories, electronic goods, stationery items.

A considerable amount of retail business is done in the local markets. The greater part of the total trade still enters and leaves by road and railway. The hats and markets are important centres where a great deal of retail business is transacted. These hats and markets are held either weekly or bi-weekly on particular day. Middlemen or beparis purchase the village products and sell them to the wholesale merchants.

Banking:

In ancient days there was no banking establishment in the district. Loans are conducted by shopkeepers who combine their regular trade with money and also by the wealthy landlords. But with the passage of time, the relative position of credit sources changed to a great extent. There is a wide network of banks in the district at present. The co-operative societies have come up in a big way to meet credit requirement in rural areas. After the nationalization, all nationalized banks opened their branch offices at main places of the district. The State Bank of India has set up its branches in many rural places also. The functioning of all kinds of banks in Kamrup district has improved rapidly now-a-days.

Table-X

Deposits and Credits of Scheduled Commercial Banks & Regional Rural Banks as on March, 2012 in Kamrup district

Category of Bank	Nos. of Offices	Rs. In crore deposits	Credit	Credit Deposit ratio
Scheduled Commercial Banks	85	2575	2223	86.33
Scheduled Regional Rural Banks	15	249	146	58.63

Source: - Statistical Handbook Assam 2012

Transport and Communication:

The district is being traversed from East to West by the National Highway (NH-37). The river Brahmaputra flows through the district and provides a very important means of water transport. There are ferry services between Guwahati and Rajaduar, North Guwahati, Kurua, Palashbari and Sualkuchi. A portion of goods and passengers come from different places of the district and also from outside the district to Guwahati to sell their goods by country boats. In the days of past, Amingaon was a harbour where ships were come from Calcutta.

As per Statistical Handbook Assam 2012 in Kamrup district there is 1926 Km of Black Topped and 1309 Km of Earthen/Gravelled PWD roads. The lengths of Roads according to different classes under PWD are mentioned as under:

1. State Highway: 89 Km
2. Major district : 230 Km
3. Rural Road : 2916 Km

Electricity and Power:

The development of agriculture as well as industry cannot be expected without the availability of power. The use of electricity has become indispensable in the modern times and the supply of electricity is also essential for the economic upliftment of the people.

Char Area:

The Char areas are those lands which are generally formed near the banks of big rivers. In Assam, such areas are usually found in low lying flood-prone zone from Sadiya to Dhubri on banks of the mighty Brahmaputra River. The river Brahmaputra carries sand annually during flood which gets deposited in its nearby areas in the both sides of banks when the floods recede. The height of low lying plain areas near to the banks of the Brahmaputra rises by depositing sandy loam or salty loam in texture. As a result of deposition of enormous load of sediments in the middle of the river course, a large number of river island called Chaparis or Chars are formed in Assam. The soil of these areas is of new alluvial nature. These are less acidic and are moderately rich in plant nutrients. People displaced by floods begin to reside in these areas and starts cultivation too. But even though, these areas are not free from the menace of flood after their settlement also. During flood, the settlers of these areas shift to some other high lands to spend the period of flood and come back to their original place of abode after flood recedes. But sometimes, due to tremendous changes of river course, many chars remain free from the flood.

i) Administration of Char Areas :

These areas are looked after by the administration of Assam Government. Even though

the rules and regulations of the state Government is followed, it is seen that the Char areas. have some sorts of local self-Government of their own. In each Char village, a person is selected by the villagers as the head of the village who is called 'Matbor' (Headman). This is mainly prevalent in the Muslim dominated Char areas. As a custom each and every persons are to follow his instruction, guidance or order. The Matbor guides the people of his locality in their many collective issues. The opinion or decision given by Matbor in respect of common issues such as casting of vote to a particular candidate during election, dispute regarding any matter relating to land, religious or social has to be obeyed by all. The highest numbers of Chars are found in Dhubri district.

ii) Socio-economic status :

The socio-economic status of the people of the char areas is infact said to be deplorable. The populaces are mostly illiterates where only about 13 to 15 percent of the total populations of entire char areas are literate. The standard of attainment of education is mostly primary level .Only a few percent has attained high school level.The economic activities of the inhabitants of chars are generally cultivation and fishing. The low-lying char areas are favourable for growing Ahu and Bao rice and also jute. The settlers of char areas are generally grow these kinds of rice and potato in large quantity. They grow various types of vegetable for sale. Whatever the amount of crops they grow they are unable to meet their both ends meet. The types of house in the char areas are mostly kutcha structure made of thatch, bamboo, reed and mud. These houses are mostly huts. A very few families have their houses with C.I. sheets as roof.

The people of all Char villages mostly use river water for drinking purpose during rainy season. However, few villages have hand-pump, tube wells from where they collect their drinking water. The villages are not connected by any roadway. The country boats are used for communication.

iii Developmental Programme undertaken:

Some developmental programmes have been undertaken by the State Government for the development of the people of the Char areas. Safe drinking water, medical sub-centres were provided by the Government in some areas. The schools up to the level of lower primary schools, middle schools are also established in some char areas. For higher education, the children have to go to nearby towns and villages. The Government of Assam also set up a Char Development Authority at Guwahati for all round development of Char people. In the district level, offices of the Project Officers are established to look into projects undertaken for these areas. Various kinds of loans and grant-in-aids are also provided to the villagers by this department.

iv) Char Area in Kamrup District :

As per Socio-Economic Survey Report, 2003-04, out of 2,251 Char villages in 14 districts of Assam, 175 Char villages are in Kamrup district. The total population of these 175 Chars is about 154508 who are spread on the total area of 17162 hectares of land. Only 15.16 percent populations are literates. 68.0 per cent population is found to live below poverty line.

The socio economic condition of Char dwellers is deplorable as they have no sufficient cultivable lands and whatever lands that have possessed are not fertile and moreover subject to flood. Generally all lands in Char areas are sandy. Out of total lands in the Char, 70% lands are cultivable. Only a few varieties of crops can be grown on such lands. Fish and other river products are available in rivers are mainly used for own and rarely on commercial line.

Tenancy:

The Tenancy Acts which have been enforced throughout the district are of relatively recent origin. The Government of Assam enacted the Assam (Temporarily Settled Districts) Tenancy Act in 1935 with a view to regulating the rights and liabilities of the agricultural tenants and land-lords. It seeks to confer upon certain right over the land. The tenants enjoyed Lakharaj lands or Khiraj lands as ryats under certain agreements, express or implied on payment of rent. But this Act was replaced and a fresh Act known as the Assam (temporarily Settled Areas) Tenancy Act of 1971 (Assam Act XXIII of 1971) which seeks to confer the right of use and occupancy of land on the tenant who is in continuous occupation of land for a period of three years. This Act also abolishes the right of the tenants to sublet the land in their occupation.

In order to provide protection to the non-agricultural tenants in the urban areas, the Assam non-agricultural urban Areas Tenancy Act was enacted in 1955. The sufficient protection has been rendered to the tenants again eviction by the landlords. The Act also makes it obligatory on the post of the tenants to pay fair rent to the landlords. The relationship between the land-lords and the tenant who is in occupation of any house on payment of rent is regulated by the Assam Urban Areas rent Control Act, 1956. It remains in force for a period of five years only.

In 1972, the Governor of Assam has promulgated an ordinance known as the Assam urban Areas Rent Control Ordinance, 1972 (Assam Ordinance III of 1972) regulating fair rent of houses situated within the limits of urban areas of Assam. The Act provides adequate protection against ejectment of the tenants from rented house. This Act is also obligatory on135 the part of the landlords.

The Assam Adhir Protection and Regulation Act was enacted in 1948 with a view to giving protection to the Adhiars who cultivated land on the basis of crop sharing with the land-lords. This Act also regulated the rent payable by the tenants. According to this Act the tenants get three-fourths to four-fifths of the total crops depending upon the supply of the plough and cattle by the landlords.

Besides the above Acts, various other Acts have also been implemented in the district to bring the land reforms in respect of conferring vitual ownership of the agricultural land on the actual cultivators. The Act has also reduced the holding of the owners of vast estates. Some of the important legislations implemented in the district are –

I. Ceiling on Agricultural Holdings : The Assam Government has enacted an Act known as the Assam Fixation of Ceiling on Land Holding Act, 1956. The main objective of the Act is to make the actual tillers of the soil, the owners of the land. The ceiling of land for the owner was fixed at 150 bighas. The Ceiling was reduced to 75 bighas of agricultural land in 1963 and again reduced to 50 bighas in 1975.

II. The Assam Land (Requisition and Acquisition) Act, 1948 (Assam Act XXV of 1948).

The Act provides for requisition and acquiring surplus lands of grant holders to provide land to the landlords, flood affected or displaced persons or to co-operative societies formed for the purpose of the district.

Revenue Administration:

Revenue administration has historically been the primary responsibility of the District Administration. This involves collection and fixing of land revenue, registration, mutation and overall management in regard to land, both private and public. Besides the Revenue Branch of the Deputy Commissioners Office, which is looked after by the Additional Deputy Commissioner (Revenue), there are 14 outlying Revenue Circles in the district, supervised by Circle Officers. The Mouzadars under the Circle Officers are responsible for collecting land revenue (*Khazna*) from land owners (*Pattadars*). All the Circle Officers are required to submit '*doul*' (demand of revenue) to the Deputy Commissioner, and after his approval, *Mouzadars* are to collect revenue as per the demand.

Development:

From the developmental angle, Kamrup district is divided into 14 Development Blocks. Below the block level set-up, there are Gaon Panchayats, each comprising a number of villages and governed by local-self bodies. From the angle of Police administration, the district area is divided among Police stations and Police out-posts.

Apart from Revenue matters, District Development is one of the very important objective of the District Administration. As head of the District Administration, the Deputy Commissioner is responsible for all round developmental activities in the district under various programmes such as MP's Local Area Fund (MPLAD), MLA's fund, Untied Fund, Sub-divisional Plan Scheme Fund, Border Area Development Fund etc. For these works, the Deputy Commissioner assigns one A.D.C. (Development) the specific task of looking after and coordinating various developmental activities undergoing in various sectors. The ADC (Development) is aided in this matter by the

decentralized Planning Cell of the DC's office. All departments, involved in the developmental activities of the district, like PWD, Irrigation, Health, Education and many others work in coordination and a District Development Committee (DDC) headed by the Deputy Commissioner has been in place to ensure this coordination. Under the Government policy of rapid upliftment of rural population, a District Rural Development Agency (DRDA) is functioning in the district, which has the Deputy Commissioner as the Chairman and one Project Director as its functional head. All schemes for Rural Development are implemented by agencies in coordination with Development Blocks situated in outlying rural areas of the district. These Development Blocks are supervised by Block Development Officers and Senior BDOs.

Law and Order:

Maintenance of Law & Order is another important aspect of district administration and the Deputy Commissioner also being the District Magistrate is responsible for proper maintenance of the same. The Deputy Commissioner is aided by the Additional District Magistrate and Sub-divisional Magistrates. The Circle Officers of the Circles also function as Executive Magistrates and are responsible for maintenance of Law & Order in their respective circle areas. The District Magistrate and other magistrates take the necessary assistance from the police department for any necessity. Police Administration of the district is headed by the Superintendent of Police. The police department has an infra-structure of Police Stations, out-posts and other auxiliary establishments in the district.

The incidence of crime in the district is not less compared to other parts of the State. The numberS of different cases of crimes reported are presented in the following table.

Table XI
The number of different cases of the crimes reported under I.P.C. in the District, 2011
Cases of Crime reported in Kamrup district-2012

Murder	Rape	Kidnapping	Dacoits	Robbery	Burglary	Riot	Criminal breach of Trust	Cheating	Theft	Counterfeiting	other
44	63	156	19	36	122	42	36	41	375	11	1933

Source: Statistical Hand Book Assam, 2012.

As may be seen in the above table, the incidence of Burglary and robbery are relatively more compared to other types of crimes, whereas cases of other crime are not less in comparison to other districts of Assam. However, the rates of conviction are very less both in the district as well as in the State as a whole

Local Self Government:

The present system of local self-government is a legacy of the British Administration and its origin may be of the principal of local taxation found in Regulation 13 of 1813. It is seen that some forms of local self-government like Namghar were in existence during pre-British period. It was a village court in which the trails of crimes and disputes were held in and judged.

The Assam Panchayat Act, 1959 operated in 1960 abolished the local Boards and a three-tier Panchayat Raj System was enforced in Assam under above act. However, the Panchayat Act, 1972 which was came into force in 5th May, 1973 transferred to two-tier system of Panchayat and the intermediary Anchalik Panchayat has been withdrawn.

As recorded in the Statistical Handbook Assam, 2012 there are 146 Gaon Panchayats and 2 Mahkuma Parishads in urban areas of Kamrup district. The Urban areas are classified as Municipal Board, Town Committee and Municipal Corporation. In Kamrup district, there are two towns having Municipal Board. These are Rangia and Palasbari.

****

ii) Census concepts

Building:

A 'Building' is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca houses:

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, Stones (duly packed with lime or cement mortar), G.I/metal/ asbestos sheets, Burnt bricks, Cement bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, G.I/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

Kutcha houses:

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic / polythene, loosed packed stone, etc. Such houses are treated as Kutcha house.

Dwelling Room:

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census house.

Village:

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area:

The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. The urban area comprises two types of towns viz; Statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

(a) Statutory Towns : All places with a municipality, corporation, cantonment board or notified town area committee, etc are known as statutory towns.

(b) Census owns: All other places satisfying the following three criteria simultaneously are treated as Census Towns.

i) A minimum population of 5,000;

ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. In addition the above stated towns, urban areas also constitutes of OGs which are the parts of UAs.

Urban Agglomeration:

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, military camps etc; may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the exiting town as their continuous urban spread (i.e., an Out Growth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an 'urban agglomeration'. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of an Urban Agglomeration (i.e. all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions, there were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

Out Growth (OG):

The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc and physically contiguous with the core town of the UA.

City:

Towns with population of 100,000 and above are called cities.

Household:

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

Institutional Household:

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggars homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category or households would cover only those

households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household : Households who do not live in buildings or census houses but live in the open or roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribes:-

The list of SCs and STs applicable in the State/ UT is given hereunder:-

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo

2 Boro, Borokachari

3 Deori

4 Hojai

5 Kachari, Sonowal

6 Lalung

7 Mech

8 Miching (Miri)

9 Rabha

10 Dimasa

11 Hajong

12 Singpho

13 Khampti

14 Garo

Language and Mother tongue:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person. Mother tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate:

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate:

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level:

The highest level of education a person has completed.

Work:

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker:

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker:

A person who worked for 3 months or less but less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker:

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator:

For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation of land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the plantation crops like– tea, coffee, rubber, coconut and betel nuts (areca). The workers engaged in Plantation crops are recorded under "other workers".

Agricultural labourer:

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker:

Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker:

A person, who has been engaged in some economic activity during the last year of reference period but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are 'Other Workers'.

Work participation rate:

Percentage of Workers (Main + Marginal) to total population.

Population density:

Population density is the number of persons inhabited per square kilometer of the area.

Age:

Age is measured in terms of the completed number of years.

Sex Ratio:

Number of females per 1,000 males in a population.

(iii) Non-Census Concepts

Civic status of urban units:

Civic Status of a town/city is determined on the basis of Civic Administrative Authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee / Municipal council, Municipality etc.

Size class of U.A./town:

Size-class of U.A./Town is based on the population size of the U.A./City/Town.

U.A.s/Towns with 100,000 and above population are classified as Class I U.A.s/ Towns. Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000- 19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty

arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cutoff point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities and the same criteria of population has been adopted in 2011 census.

Concepts used in VD and TD of DCHB:

1. Educational Amenities:-The type of different educational facilities available in the village is given in numbers. Both Government and private educational facilities / institutions are considered for this-purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only three educational institutions. So also in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder:

1.1 Pre-primary (PP): Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from preprimary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.

1.2 Primary School (P): Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.

1.3 Middle School (M): Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.

1.4 Secondary School (S): Schools providing education from Standard IX and upwards up to and inclusive of Standard X are classified as Secondary Schools. A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

1.5 Senior Secondary School (SS): Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

1.6. Degree College: (i) **Arts/Science/Commerce** : These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

(ii) **Engineering College (E)**: It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B. Tech.) or post-graduate engineering degrees like M.Tech.

(iii) **Medical Colleges:** These are graduate/post-graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D or equivalent in the above branches of medicine.

1.7. Management College/ Institute (MI): It offers courses like Diploma in Management, Post-Graduate Diploma in Management, Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt): An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI: It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC): Non-vocational education centers, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification, and age. These education centers are open to all.

1.11. Special School for Disabled: There are Government and Government recognized institutions/ organizations engaged for providing education to different groups of disabled persons.

2. Medical Facilities:

2.1 Hospital-Allopathic and Hospital-Alternative medicine: A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31 to 500 depending upon whether these are sub-district, sub-divisional or district hospitals. If there is hospitals providing facilities under different systems of medicines such as, Allopathy, Ayuveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathy: The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b)Ayurveda: Ayurveda means 'Science of life'. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements are represented in the form of Tridosha: Vata, Pitta and Kapha. These three 'doshas' are physiological entities of living beings. Ayurveda developed into eight distinct specialities, i.e., Internal Medicine, Pediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of virility. Two types of treatments, Preventive and Curative, are given in Ayurveda.

(c) Unani: Treatment of Unani consists of three components, namely, preventive, promotive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Artharitis. Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani System emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movement and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d) Homoeopathy: Treatment in Homoeopathy, which is holistic in nature, focuses on an individual's response to a specific environment. Homoeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animal sources. Homoeopathic medicines do not have any toxic, poisonous or side effects. Homoeopathic treatment is economical as well and has a very broad public acceptance.

2.2 Community Health Centre (CHC): Community Health Centres are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/ hilly areas and 1, 20,000 populations for plain areas. CHC is a 30- bedded hospital providing specialist care in Medicine, Obstetrics and Gynaecology, Surgery and Paediatrics.

2.3 Primary Health Centre (PHC): A Primary Health Centre is the first contact point between a village community and the Government medical officer**.** A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor/observation beds. It acts as a referral unit for 6 sub-centres. It has a medical officer and para medical staff.

2.4 Primary Health Sub- Centre (PHS): A Primary Health Sub-centre is the first contact point between the primary health care system and the community. As per the population norms, one PHS is established for every 5,000 population in plain areas and 3,000 population in hilly/ tribal/ desert areas. Each PHS has a sanctioned strength of one male and one female heath worker.

2.5 Maternity and Child Welfare Centre (MCW): It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counseling, delivery, immunization of children with check-up etc.

2.6 TB Clinic (TBC): The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District

Tuberculosis Centre (DTC) act as referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the district and it also functions as a specialized referral centre. The functions of sub-district level Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7 Health Centre: Clinic where medicine and medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8 Dispensary: Place where patients are treated and medicines provided but with no in-patient facility. Immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9 Veterinary Hospital: Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animals like cows, buffaloes etc in rural areas.

2.10 Mobile Health Clinic: These are Mobile vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated days to deliver the health care services. The services generally offered are OPD, ante-natal and post-natal, B.P. examination, X-ray, ECG, Immunization, First Aid etc.

2.11 Family Welfare Centre: Check-up and counseling is provided to the pregnant and married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12 Nursing Home: A nursing home is a long – term care facility licensed by the state that offers 24-hour room and board and health care services including basic and skilled nursing care, rehabilitation and a full range of other therapies., treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13 Medicine Shop: A shop which sells drugs and medicines of any system of medicine viz. allopathic, homeopathic, ayurvedic or unani medicines, is considered as a medicine shop. Sometimes some shops and Paan shops also keep ordinary medicines, like Crocin, Burnol etc. These shops are not taken as medicine shops.

3. Drinking water: The following are the main source of drinking water facility (ies) available in the village.

3.1 Tap Water-treated: This source of drinking water refers to a source of drinking water which is provided to the villagers through pipes within their premises or to the villagers through common taps (public taps/community water points) by the Government departments, local bodies, panchayats, public or private estate agencies, etc. after treatment. Such a source is treated as 'Tap water from treated source'.

3.2 Tap Water-un-treated: If the villagers are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water, or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as 'Tap water from un-treated source'.

3.3 Covered Well (CW): A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snowmelt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animals cannot fall down the hole. It is considered as covered well.

3.4 Un-covered Well (UW): A well which is (1) un-covered on sides from runoff water, (2) un-covered from bird droppings and animals; or (3) both.

3.5 Hand Pump (HP): Hand pump means where ground water is taken out manually by operating a hand pump.

3.6 Tube Well / Borehole (TW): Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lark are self explanatory.

4. Community Toilet Complex : Community Toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Sauchalaya or likes.

5. Rural Sanitary Mart or Sanitary Hardware Outlet (RSM): It is an outlet dealing with the materials, hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygiene accessories required for individuals, households and the environment in the rural areas.

6. Community bio-gas or recycle of waste for productive use: Many of the solid wastes having economic values but put for disposal can be recycled for reuse. For example, food, cow dung, leaves, vegetable, paper, wood, plastics, old cloth etc. However, some of the wastes are not recyclable. These are carbon paper, thermo coal etc. When recyclable solid wastes is subjected to decomposition, bio-gas could be produced under favourable conditions. These systems of recycling may be there at the village level organized by Gram Panchayats with technical support from Governments or non-government organizations.

7. Communication and transport Facilities: 7.1 Post Office (PO): Self-explanatory.**7.2 Sub-Post Office (SPO):** Sub-post office includes Extra Departmental Post Offices and those providing franchise postal services and also part time services in lieu of some honorarium. The limited postal services include sale of stamps, receipt of letters and money orders and also distribution of letters.

7.3 Post & Telegraph Office (PTO): Telegraph office is set up by the Government to enable people to send or receive telegrams. If the phonogram facility is available (though the Telegraph office may not be equipped with Morse Code Transmitters), the village is considered to be having telegraph facility.

7.4 Telephones (landlines): If the village is having the Public Call Office (PCO) either run by the Post Office or by individuals or by a private shop, then the village is considered to be having telephone facility.

7.5 Public Call Office (PCO)/Mobile PCO: Self explanatory.**7.6 Mobile Phone Coverage:** Mobile phones are now very common particularly in urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered to be having access to mobile phone.

7.7 Internet Cafes/Common Service Centres (CSC): If the village is having the facility of Cyber Cafes or shops owned by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of providing all government services in an integrated manner at the door step of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non-IT based services.

7.8 National Highway (NH): These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH-2 for easy identification.

7.9 State Highway (SH): These are roads of a state linking district headquarters and important cities within a State and connecting them with NHs or Highways of the neighboring States.

7.10 Major District Roads (MDR): These are important roads within a district, serving areas of production and markets and connecting these with each other or with the main Highways.

7.11 Other District Roads (ODR): These are roads serving rural areas of production and providing them with outlet to market centres, taluka headquarters, block development head quarters or other main roads.

7.12 Village Road: The approach to village refers to the state of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

7.13. Black-Topped (Pucca) Road (BTR): A road provided with a bituminous surfacing.

7.14 Gravel (Kuchha) Road (GR): A road constructed using well compacted crushed rock or gravel material (coarse sand, small stones), which is fairly resilient and does not become slippery when wet.

7.15 Water Bound Macadam (WBM): This is the road layer made of crushed or broken mixture of sand and rock fragments mechanically interlocked by rolling and voids filled with screening and binding material with the assistance of water.

7.16 Foot Path (FP): A trodden path for the use by pedestrians and in some cases bicycles. The Foot Paths are not suitable for vehicular traffic except bicycles in some cases. Most of the interior/forest villages are connected by Foot Paths.

8. Banks and Credit Societies: - Banking facility means a place where a person can operate a bank account. **8.1 Commercial Bank (CB):** These may be banks wholly owned by the Government of India. or by Indian or Foreign Companies. **8.2 Cooperative Banks (Coop. B):** A co-operative bank is a financial entity which belongs to its members, who are at the same time the owners and the customers of their bank. Cooperative banks are often created by persons belonging to the some local or professional community or sharing a common interest. These banks are registered under the Cooperative Societies Act. The cooperative banks are regulated by RBI and are covered by the Banking Regulations Act, 1949. **8.3 Agricultural Credit Society (ACS):** Major objectives of the ACS are to supply agricultural credit to meet the requirements of funds for agricultural production, the distribution of essential consumer commodities, the provision of storage and marketing facilities and for light agricultural implements and machinery. **8.4 Non-Agricultural Credit Society (NCS):** These societies include consumer cooperative societies and also credit cooperative societies of certain categories of persons like teachers, health workers, etc.

9. Miscellaneous Facilities: 9.1 Self-help Group (SHG): Self-Help Groups are groups of between 10-25 women created by either NGOs or under the SGSY (Swarnjayanti Gram Swarozgar Yojana) for the purposes of meeting local credit needs. They are sometimes called Mahila Mandals in villages.

9. 2. Public Distribution System (PDS) shop: The shops through which some essential commodities are sold by the government at subsidized rates. They may also be known as ration shops and control shops.

9.3. Mandis/Regular Market: These are those clusters of shops with or without fixed premises which are open on at least six days a week and opens at least from morning hours to dusk.

9.4. Weekly *Haat*: These are those clusters of shops with or without fixed premises which are open once a week.

9.5. Agricultural Marketing Society: It is a common platform to analyse the issues among all the individuals and institutions in the field of agricultural marketing.

9.6. Nutrition Centre: Integrated Child Development Services (ICDS): The Integrated Child Development Services (ICDS) Scheme set up by the Government of India with the objective of providing following package of services to the children under 6 years and pregnant and lactating mothers in villages such as; Immunization, Health Check-up, Referral Services, Pre-school Non-formal Education and Nutrition & Health Education.

9.7. Anganwadi Centre: Each centre under the ICDS scheme is run by an Anganwadi Worker. One Anganwadi worker is appointed for specified population of the village. They are basically local women. They are assisted by Anganwadi helper. They provide pre-school non-formal education at the Centre and provide food to the children.

9.8. Accredited Social Health Activist (ASHA): ASHA is a health activist in the community who will create awareness on health and its social determinants and mobilize the community towards local health planning and increased utilization and accountability of the existing health services. She would be a promoter of good health practices. She will also provide a minimum package of curative care as appropriate and feasible for that level and make timely referrals. She will act as a motivator of different types of health related activities. Unlike ANM, she will not be involved in any clinical activities like immunization.

9.9. Sports Club/Recreation Centre: Indoor and out-door games are arranged by the Club and activities like wrestling, Judo Karate etc. are also done there.

9.10. Cinema/Video Hall (CV): If regular cinema houses licensed by Government is available, then the town/village is considered to be having the facility of Cinema Hall. Video hall owners screen films in their own or hired premises.

9.11. Public Library: Books are kept there which can be accessed by the public on loan basis. These may be sponsored by Government or Local Body or Panchayat or any influential person. Free service or nominal charges are made for using the facility.

9.12. Public Reading Room: Here the public may read newspapers and magazines. These may be sponsored by Government or Local Body or Panchayat or any influential person.

9.13. Newspaper Supply: The availability of the Newspaper(s), both in English or vernacular, in the village is considered to having the said facility.

10. **Availability of Electricity/Power.** If power is actually available, whatever may be the form of its use, it is indicated affirmative. If the village is having

electricity for domestic purposes and the residents are using the same for domestic use, then it is considered that domestic power supply is available. If the electricity authority has not given domestic supply to the households on their request and people are using unauthorized electricity either by stealthily or misuse the supply meant for agricultural or industrial purposes, then it is not considered as availability of electricity for domestic purposes. However, if the village goes out of power due to temporary technical problems such as, transformer failures, theft of electrical equipment, etc., it is considered that electricity is available. Supply of electricity is considered available even when there is a temporary ban on new domestic connections. Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial basis, charitable, educational and religious institutions are included in the domestic category.

10.1 Power Supply for domestic use: This category includes electricity used only for domestic consumption.

10.2 Power supply for agricultural use: This category includes all electricity connections given to the farmers for conducting various agricultural activities including irrigation.

10.3 Power supply for commercial use: This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

10.4 Power supply for all uses: This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

11. Land Use Pattern: The land use area of the villages is given in hectares. The land use pattern in the Village Directory conform to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

12. System of drainage : Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

13. Type of latrines: The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine.
(i) Pit System: The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine.

(ii) Flush/pour flush: A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used). (iii) **Service:** Type of latrine from where night soil is removed manually by scavengers. All other types of latrines are covered under "Others" category.

14. Protected Water Supply- Source and capacity of Storage system: There are various sources of water supply and its storage system in the town.

14.1 Service Reservoir: A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

14.2 River Infiltration Gallery: Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too shallow for **intake screens**. Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

14.3 Bore Well Pumping System: A bore well is a well of 6" to 12" in diameter drilled into the earth for retrieving water. The depth of a bore well can vary from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

14.4 Pressure Tank: Tank that is used to ensure consistent water pressure and for storage of water. Usually located in basement of house but sometimes (in older settings) located in well pit.

15. Road lighting (Points): Road lighting means the number of street lights that are maintained in the town.

16. Home Orphanage: Orphanage is the name to describe a **residential institution** devoted to the **care** of **orphans** – children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a **ward of the state**, and orphanages are a way of providing for their care and housing.

17. **Working women's hostel:** These may be recognised or non-recognised by any public authority. The data on number of working women's hostels available in the town are collected with number of seats.

18. **Old Age Home:** There are two types of Old Age Homes in India. One is the "Free" type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the "Paid" home where care is provided for a fee. Nowadays, such "Retirement" homes have become very popular in India and they are well worth considering.

19. **Stadium:** A stadium is a place, or venue, for (mostly) outdoor **sports**, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

20. Auditorium/Community Hall: These are the places where meetings, social functions etc. are organised.

(iv) 2011 Census findings – Population and its distribution:

a) The total population of Kamrup district as per Census 2011 is 1517542. Male comprises 778461 while female consists of 739081. Out of the total population of the district, 1375148 falls under rural and 142394 are under urban areas of the district. In rural areas 706140 and 669008 are males and female respectively. Accordingly 72321 and 70073 are males and females respectively in urban of the district. The percentage of urban population in the district is only 9.4. So it can be clearly seen that most of the population dwell in the rural areas of the district.

b) The decadal growth rate of the district comes to 15.7. Kamrup is a quite densely populated district. The density of the district is 489 persons per Sq. kms. The sex ratio is the number of females per 1000 males in the population. The district has a Sex Ratio of 949 as against 958 in the State.

c) The literacy rate of Kamrup district is 75.5 % of which 81.3 % is for males and 69.5 % is for females.

d) Considering the distribution of Scheduled Castes (SC) and Scheduled Tribes (ST) population in the district, we find that there are 107827 SC persons comprising of 55237 males and 52590 females. The percentage of Schedules Castes population to total population is 7.1. The total Scheduled Tribes population in the district is 182038 comprising of 92094 males and 89944 females. The percentage of ST population to total population in the district is only 12.0.

e) The percentage distribution of the working and nonworking population of the district is as follows.- Out of total population of the district, 41.4% are workers of which 55.0 % and 27.1 % are male and female respectively. The percentage of non- workers is 58.6% in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 29.5 %, 15.8%, 11.0% and 43.6% respectively.

f) In the district, there are 2 Statutory towns.viz. Rangia (MB) and Palasbari (MB) .There are 14 Census towns in the district viz Udiana (CT), Sualkuchi (CT), Bamun Sualkuchi (CT), Niz-Hajo (CT), Majarkuri (CT), Kochpara (CT), Nahira (CT), Upar Hali (CT), Dahali (CT), Sarpara (CT), Parlli Part (CT), Sanpara (CT), Changsari (CT) and Jalah (CT).

(v)Brief Analysis of Primary Census Abstract Data based on Inset Tables

TABLE 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 2001-2011

Sl. No.	Tahsils	Population						Percentage Decadal Variation 2001-2011			Percentage Urban Population	
		2001			2011

12	North Guwahati (Pt)	42,395	42,395	0	48,227	36,405	11,822	13.76	-14.13	0.00	0.00	24.51
District Total		**13,11,698**	**12,53,617**	**58,081**	**15,17,542**	**13,75,148**	**1,42,394**	**15.69**	**9.69**	**145.16**	**4.43**	**9.38**

Table 1 : It contains the the decadal change in population of Tahsils/Revenue Circles by Residence, 2001-2011. There are 12 tehsils in Kamrup district, viz Goreswar (Pt), Rangia (Pt), Koya, Kamalpur, Hajo, Chhaygaon, Goroimari, Chamaria, Nagarbera, Boko, Palashbari, North Guwahati(Pt) . As per Census 2011, total population of the district is 1517542 of which 1375148 are in Rural and 142394 are in Urban. Percentage of The decadal variation from 2001-2011 is 15.69% with 9.69% in Rural and 145.16% in Urban. It is seen from the table that the Urban Population has increased from 4.43% in 2001 to 9.38% in 2011. The Revenue Circle having the highest decadal growth rate in total population is Goroimari with 30.37% whereas lowest is inKoya Revenue Circle with 8.79%. Likewise, in Rural, the higest growth rate is observed in Goroimari with 30.37% and lowest in North Guwahati(pt)showing negative growth of -14.13%. For Urban, the percentage of Decadal Growth is highest in Palashbari with 386.45% and lowest in Rangia(Pt) with 29.35% whereas there is no urban population under Goreswar (Pt),Koya,Kamalpur,Chhaygaon, Goroimari,Chamaria,Nagarbera, Boko and North Guwahati(Pt) Revenue Circles.

TABLE 2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2011 (Rural)

Serial number	District / CD Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10
1	0180-Bihdia Jajikona	75	1,08,401	55,634	52,767	0 (0 %)	0	0	6 (8 %)

Table2: It gives the CD blockwise distribution of number and percentage of inhabited villages in specified population size ranges with the related population, 2011 (Rural). Out of 1037 total number of inhabited villages in the district, 17% are in the population size range less than 200 population, 24% are in the population size range between 200 -499 population, 23% in the population range 500-999, 20% are in the population size range between 1000-1999, 2% is in the population range 2000-4999. Among the CD blocks, Boko CD block has the highest number of inhabited villages with 138 numbers of inhabited villages of which the highest number of 46 villages are noticed in the population size range between 200-499 . The smallest number of inhabited village is noticed in Sualkuchi CD block with 35 villages of which the highest number of 9 villages are found in the population size range between 200-499 and 1000-1999.

Table 3
New towns, de-notified, declassified and merged town in 2011 Census

	Name of town
(a) New	
(i) Statutory town	NIL
(ii) Census town	1) UDIANA (CT) 2) NIZ-HAJO (CT) 3) MAJARKURI (CT) 4) NAHIRA (CT) 5) UPAR HALI (CT) 6) DAHALI (CT) 7) SARPARA (CT) 8) PARLLI PART (CT) 9) SANPARA (CT) 10)CHANGSARI (CT) 11) JALAH (CT)
(b) Denotified	
(i) Statutory towns of 2001 census denotified and also did not satisfy the criteria to be treated as census towns	NIL
(ii) Statutory towns of 2001 census denotified but identified as census towns based on demographic and economic criteria	NIL
(iii) Census towns of 2001 census are notified as statutory town in 2011 census	NIL
(c) Declassified	NIL
(d) Wholly merged with other town (s)	NIL

Table3: It contains information about new towns, de-notified, declassified and merged in the district as per 2011 Census. It is seen from the table that no new Statutory town was formed in 2011. Moreover,11 new Census Towns viz.UDIANA (CT), NIZ-HAJO (CT), MAJARKURI (CT), NAHIRA (CT), UPARHALI (CT) , DAHALI (CT), SARPARA(CT),PARLLI PART(CT), SANPARA(CT), CHANGSARI (CT) and JALAH(CT) have emerged in 2011. No Statutory Town of 2001 is either denotified, declassified or wholly merged with other town (s) as per report.

TABLE: 4
SEX RATIO OF STATE AND DISTRICT, 1901 - 2011

Census Year	Assam			Kamrup		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	576	1012	1012	-
1911	915	923	626	984	984	-
1921	895	906	613	940	942	772
1931	874	885	574	925	927	764
1941	875	886	605	888	889	734
1951	868	878	663	869	871	713
1961	869	887	661	876	884	712
1971	896	912	744	900	903	843
1981	-	-	-	-	-	-
1991	923	934	838	924	928	856
2001	935	944	872	934	935	915
2011	958	960	946	949	947	969

Table 4: It gives information about the sex ratio of the state and district from 1901 to 2011. The total sex ratio in the state from 1901 to 1931 shows a declining trend while in 1941 it increased by one than in 1931. Again from 1941 to 1951 it went on decreasing. But from 1951 onwards, it has shown an upward trend. In case of rural, the case is same for the state level also, whereas in case of urban, it is fluctuating. For the district of Kamrup, as per Census 2011, the total number of Females is 949 against 1000 males, which is lower than the State Sex Ratio of 958; in Rural it is 947 which is also lower than the State sex Ratio of 960. In case of, Urban the ratio is 969 for the district which is higher than the State Ratio of 946.

TABLE: 5
SEX RATIO BY SUB-DISTRICTS, 2011

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban

Table 9: It indicates the sex ratio of population in the age group 0-6 for Sub-districts/ Revenue Circles of Kamrup District. In the District, the total population in the 0-6 age group is 200061 of which 101716 are males and 98345 are females. Out of the 12 Sub-Districts, Goreswar(Pt) has the highest sex ratio being 1013 females against 1000 males and lowest is in North Guwahati(Pt) with a ratio of 898. Moreover, in case of rural, the highest is again in Goreswar (Pt) with 1013 and the lowest in Nort Guwahati (Pt) with 888. In case of urban, the highest is in Hajo Sub-District with a ratio of 980 and lowest is in Palasbari with a ratio of 921. For the entire district, the total Sex Ratio for the age group of 0-6 is 967, in Rural 968 and in Urban 944. Goreswar (Pt),Koya ,Kamalpur, Chhaygaon,Goroimari,Chamaria,Nagarbera and Boko show no record of urban population in 0-6 age group.

TABLE :10

Sex ratio District (Rural): 968

Table 11: This table contains the sex ratio of rural population in the age group 0-6 by ranges. Out of 1037 inhabited villages, the highest number of villages is 239 which corresponds to the range of sex ratio 1100+ with a percentage of 23.05 and the lowest number of inhabited villages is 32 corresponding to the range 700-749 with a percentage of 3.09. Similarly, the population of 0-6 age group is highest corresponding to the range 1000-1099 with a population of 50625and 27.09% being the percentage distribution of population whereas the the lowest being recorded against the range 700-749 with a population of 3294 and 1.76% population distribution.

Table 13: It gives information relating to the number and percentage of scheduled castes and scheduled tribes population in the Sub-districts/ Revenue Circles. In the district, the total population is 1517542 of which 107827 are Schedule Castes and 182038 are Schedule Tribes. Thus, the percentage for Schedule Castes as a whole for the distrct is7.11% and Schedule Tribes is 12%. In case of rural, out of the total population, 6.47% are Schedule Castes and 13.1% are Schedule Tribes whereas in case of urban, out of the total population, 13.24% are Schedule Castes and 1.3% are Schedule Tribes. Among the Sub-Distrcts,Hajo has recorded the highest Schedule Castes population of 36725 with a percentage of 13.99 and the lowest SC population of 1115 with 2.93 percent is recorded corresponding to the Sub-District Goreswar(Pt). On the other hand, the highest Schedule Tribes Population of 70688 is recorded with 2.42 % corresponding to Boko and the lowest is recorded as123 with 0.16% corresponding to the Sub-District Nagerberra

Table 33: It provides information about distribution of workers by sex in four categories of economic activity in Sub-District. In 12 Sub-Districts of Kamrup District, total population is 1517542 out of which 778461 are males and 739081 are females. Total workers in the 12 Sub-Dictricts, including Main & Marginal workers is628954 , total Male Workers is 428492 and total Female Workers is 200462 . Workers are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. As per report, 29.54% Workers are Cultivators, 34.96% are Male

Cultivators and 17.96% are Female. 15.82% are Agricultural Labourers, 12.92% being Male and 22.03% being Female. Only10.99% are Household Industry Workers, 4.93% being Male and 23.93% being Female. Again,43.65% are included under Other Workers,47.19% are Male and 36.08% are Females.

Table 34: It contains information about distribution of workers by sex in four categories of economic activity in CD blocks. In 14 CD Blocks, total population is 1375148, out of which 706140 are males and 669008 are females. Total Workers in the 14 CD Blocks, including Main & Marginal workers is 572782 , Total Male Workers is 387764 and Total Female Workers is 185018 . Like in Table 33, Workers are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers.As per report, 32.12% Workers are Cultivators,38.18% are Male Cultivators and 19.42 % are Female. 16.92% are Agricultural Labourers, 13.70 % being Male and 23.68 % being Female. About 9.87 % are Household Industry Workers, 4.12 % being Male and 21.93 % being Female. 41.08% are included under Other Workers, 43.99 % are Male and 34.97 % are Females.

Note:-

* Education includes all education facilities.
^ Medical includes all medical facilities.
\# Post office includes post office, telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.
@ Bank includes Commercial Bank and Cooperative Bank.
** Telephone includes Telephone,PCO and Mobile.

Table 36: It consists of the information about distribution of villages according to availability of different amenities. Under the 14 CD Blocks, number of inhabited villages is 1037 and the highest number of inhabited villages is 138 under Boko CD Block. All the amenities such as Education, Medical, Drinking Water, Post Office, Telephone, Transport Communications, Banks, Agricultural credit societies, Approach by pucca road and Power Supply are available in most of the villages. It is observed from the table that 974 Villages have Education, 621 Villages have Medical, 100 % Villages have Drinking Water,152 Villages have Post office, 786 Villages have Telephone, 734 Villages have Transport Communications, only 41 Villages have Banks and 90 Villages have Agricultural credit societies , 310 Villages are approachable by Pucca Road and 889 Villages have Power Supply facilities available.

Table : 37
Number and percentage of rural population served by different amenities, 2011

** Telephone includes Telephone,PCO and Mobile.

Table 37: It consists of the information about number and percentage of rural population served by different amenities.Under 14 CD Blocks, total population is 1375148. Most of the population of Rural Areas are served by the amenities such as Education, Medical, Drinking Water, Post Office, Telephone, Transport Communications, Banks, Agricultural credit societies, Approach by pucca road and Power Supply. It is observed from the table that 99.49% of total population are availing Education, 87.63% are availing Medical Facilities, 100% population are getting Drinking Water, 32.57% are availing Post Office facility, 89.43% are taking Telephone facility, 89.85% are availing Transport Communication facilities, 13.52 % are availing bank facility,12.59 % are availing the Agricultural credit society facility, 65.57% are availing Pucca Road facility and 97.11% are availing Power Supply facility.

TABLE: 38
DISTRIBUTION OF VILLAGES NOT HAVINCERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE,

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
1	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education:-				
(a) Primary school	44	17	4	65
(b) Middle school	260	102	44	406

(a) Hospital	201	367	462	1030
(b) PHC	294	432	278	1004
3. Post office-	634	171	80	885
4. Telephone	131	79	41	251
5. Bus service	78	184	92	354
6. Bank:-				
(a) Commercial Bank	224	438	334	996
(b) Cooprative bank	280	342	396	1018
7. Agricultural credit societies	211	271	465	947

Degree college includes Art,Engineering and Medicine
Hospital includes Allopathic & Alternative Medicine
Post office includes post office, telegraph office and post & telegraph office
Telephone includes Telephone,PCO and mobiles
Bus includes private and public

Table 38: It provides data on distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available. In case of Education Facilities, Primary Schools are not available in 65 Villages, Middle Schools are not available in 406 Villages and 1025 Villages have no Degree Colleges. However, these facilities are available in the range of Less than 5 KMs, 5-10 KMs and 10+ KMs from the villages respectively. Similarly, number of villages are also shown for other amenities in the table, such as Medical, Post Office, Telephone, Bus Service, Banks and Agricultural credit societies.

Table :39

Distribution of villages according to the distance from the nearest statutory town and availability of different amenities, 2011

Distance Range from the nearest Statutory Town (In Kilometres)	Number\ Percentage	Number of Inhabited Villages in Each Range	Type of amenity available							
			Education *	Medical^	Post Office#	Telephone **	Transport Communications $	Banks @	Agricultural Credit Societies	Approach by Pucca Road

Table 45: It gives data on the most important commodities manufactured in towns. Name of three most important commodities manufactured in the 16 towns are mentioned townwise.

(vii) Major social and cultural events, natural administrative developments and significant activities during the decade.

Assamese society has been a melting pot of various cultures. The greater portions of the people are Hindus followed by Muslims and than other religious in Assam. So is the case in Kamrup district. The joint family system was common in all districts of Assam in the long past. But it is losing its hold gradually and now-a-days it is very rare to look into. The property is generally possessed by the head of the family. He or she manages it as its custodian. The marriage by negotiation is common among Hindus. The caste system is not as rigid as it was a few decades ago. Like most other societies Assamese society is also patritineal with the children taking their father's name. The sons and daughters are entitled for father's property.

Inter-caste marriage in the district is not very frequent among Hindus. But in the present days, it is slowly and gradually taking place. In rural areas of Assam, Assamese families have their distinct types of houses for their different uses. But the family of other communities does not possess such types of dwelling houses. In rural areas of the district, houses are built out of thatch, bamboo and mud. With the passage of time on who can able to spend more money has begun to build his house on modern style with modern materials.

Assamese men wore Suria or Dhuti and women Riha-Mekhela. Dhuti or Suria was worn above the knee. A section of people used to wear dhuti till their ankles. The upper parts of their body were covered by Chador. The Ahoms introduced Sola (Shirt), Chapkan etc. The turbans were started to wear by men from the Ahom period. From these traditional dresses people have changed their dresses to modern modes of dresses. The use of Mekhela-Chador is vogue even now though the womenfolk have also started using other varieties of dresses.

Men and women have always adorned themselves with ornaments. At the time of Ahom rule, men wore ornaments like Motamoni, Kundal, Biri and Magardana, Lokaparo and women wore Keru, Moni, Angathi, Kharu, Nalak, Khanphul, Baju, Keyur, Nupur, Kinkini etc. But use of these types of ornaments can be seen in rare occasions. Ornaments like Neckless, Earring, Kharu, Chain are now commonly used by the women of all communities/religions in the district.

Colourful festivals observed in the district enliven the lives of the people. Important festivals of the year are *Durga Puja*, *Sivaratri*, the *Dol-jatra* and important pujas are *Viswakarma* puja, *Sarswat*i puja, *Lakshmi* puja and *Kali* puja. Muslim also observe Id-Ul-Zuha, Muharram, Fatiha-I-Duazdalan and Id-Ul-Fitre.

The special festivals of the Assamese of the district are the three Bihus:– the *Rangali Bihu* (April 14), *Bhogali Bihu* (Jan. 13 or 14) and *Kati* Bihu (Oct. 14th) which are associated with the cycles of cultivation. *Rangali Bihu* is the festival, where groups of Assamese people dance and sing the *Bihugit*. As the girls dance, the boys play on flute and beat drums and blow the *pepa*, made of buffalo-horn and t*aka*.

The *Namghar* is the community prayer hall of the villagers, who held prayer services known as *nam-kirtan* during religious festivals. Exquisite folk songs and Ballads such as *Biya-nam* (marriage songs), *Tokari git* (songs of the mendicants), *Ai-nam* (songs in praise of Goddess) etc., are sung in the district.

Most of the indigenous games played in the district in the past have been changed over to western games and sports. Football, Cricket, Volleyball etc. are now very popular among the youths of all communities. Indoor games like Caroms, Cards, Chess etc are played in the towns and villages of the district.

(viii) Brief description of places of religious, historical or archaeological importance and places of tourist interest in the district.

Assam has a large number of monuments which speak profusely of the architectural skill of the ancient Assamese. These monuments are mostly temples dedicated to various Gods and Goddesses. Some of such monuments are situated in Kamrup district.

Hayagriva Madhava Devalaya :

It is the most important temple built on the top of the low hill called Manu Parbat in Hajo. It was said to have been constructed by Aurba Rishi and was rebuilt by the Koch king, Raghudeva in 1538 A.D. after it was destroyed by the Mohammedans. It was constructed of stones and to its front is attached to a pillared hall. Inside the temple there are two images of Madhava and an image each of Basudeva and Garuda. The outer walls of the temple are decorated with sculptures of Hindu Gods and Goddesses. The figure of an elephant at the basement of the temple is a special feature of the temple.

Kedarnath:

Kedarnath temple is located at Hajo which is also built of stones. The figure of worship in the temple is Sivalinga. The stone inscriptions in the temple record the temple being thoroughly repaired by Tarun Barphukan during the reign of the Ahom king, Rajeswar Singha.

Powa Mocca:

The Powa-Mocca Mosque stands on the highest hill in the neighbourhood of Hajo. The mosque was built by Pir Giasuddin Aulia in 1067 Hijri and is held that it has one fourth sagacity of Mocca. Thus it is known as Powa-Pocca.

Baidargarh or Phinguagarh :

It is another important antiquity situated near Betra in Rangia circle. It is a square fort surrounded by embankments each of which is 7 kms. length. It is believed to have been erected by Baidyadeva.

Sualkuchi:

Sualkuchi situated at a distance of 24 Km from Guwahati is renowed centre of silk production.It has large number of cottage industry engaged in handloom for which it is also known as the 'Manchester of Assam'.

Chanda's Merghar at Chaygaon:

It is a site with which a mythological story is attached to a merchant named Chanda Saudagar and his son lakhindar and his daughter-in-law Beula. The story goes that Chanda Saudagar who was a devotee of Lord Siva, once got acursefrom 'Nag devata' that he would have no descendents any further as his only son would be killed on the latter's wedding nite. To prevent this, Lakhindar and his bride was confined in the Merghar. However, despite every effort Lakhindar was bitted to death by 'Nag Devata'.It was Beula's relentless offerings and prayers that saved her husbands's life later on. Ruins of 'merghar' and replica odf Siva idols are still found around this site.

Sidheswar Devalaya:

It is situated in Sualkuchi. It is an ancient Siva temple which was built during the time of Ahom King Siva Singha's rule.

(ix) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Agriculture is the primary occupation of the people of the district. Agriculture has been the mainstay of its economy. Two-thirds of its population still lives by agriculture.The staple crop of the district is rice, of which there are three crops. The indigenous manufactures are confined to the weaving of silk and cotton cloths for home use, and to the making of brass cups and plates. The chief exports are rice, oil seeds, timber and cotton; the imports are fine rice, salt, piece goods, sugar, betel nuts, coconuts and hardware. Sualkuchi also called the Manchester of Assam produces and exports silk materials not only outside the state but also to the other countries.

Kamrup has seen births of many great persons who brought laurels to their motherland. Ananta Kandali born at Hajo in 1520 AD was well-known poet and Sankardeva's contemporary. His poetical works includes Kumarharan, Britasur Badh etc. He translated the middle portion and the tenth chapter of the Shrimad Bhagavat under the guidance of Srimanta Sankardeva. Bishnuram Medhi, an Indian political and freedom-fighter who served as the Chief Minister of Assam and Governor of Madras state from January 1958 till May 1964 was born at Hajo on 24th April, 1888. Nabin Chandra Bordoloi from North Guwahati was a writer, freedom fighter and political leader. Mamoni Raisom Goswami ,a noted litterateur, novelist from Kamrup district was awarded Jnanpith, the most prestigious literary award of the country.

Kamrup district has contributed to the growth and development of the state not only by its land and forest resources but the district also houses untapped resources from its rivers and tributaries which if properly utilized can greatly contribute towards revenue of the state. Kamrup district have also contributed to the state with personalities in various fields from politicians, social workers, writers, freedom fighters and others. The district of Kamrup which is still a developing district needs to be strengthened in its economic aspects. The district needs to be developed in the field of transport and communication with better roads and railway lines so that trade industry can be developed .This in turn can contribute towards the all round development and growth of the state as a whole

(x) Scope of Village Directory and Town Directory - Column headingwise explanation and Coverage of Data:-

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory 2011 Census:-

The village Directory is being compiled for both inhabited and un-inhabited villages. In the village directory both private and government facilities/ institutions have been given. In case of un-inhabited/ depopulated villages, the location code number, name and area of the village is being given universally in Village Directory and Village PCA. The columns relating to the amenities and land use pattern, etc. being left blank and it will be noted against the name of the village that it is un-inhabited/ depopulated. The Appendices to Village Directory and Inset Table based on village Directory data are also prepared for inhabited villages.

In the Village Directory format for 2011 Census there are 121 columns and the details thereon are as follows:

Columns 1: Serial Number:- Self explanatory . All the villages within the CD block are presented serially in the ascending order of their location code number.

Column 2: Name of Village:-Self explanatory. The name of the villages are shown against this column. This also includes the forest and uninhabited villages.

Column 3: Location Code Number of village:- The location code number of the villages are shown against this column.

Column 4: Area of the Village:- The area of the villages has been given in hectares.

Column 5: Total Population:- The total population of the village as per 2011 Census has been given against this column.

Column 6 : Number of households:- The number of households as per 2011 Census have been given in this column.

Amenities:- The availability of different infrastructural amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, recreation and cultural facilities, communication, power, etc. in each village have been given in the Village Directory. Wherever the amenities are not available in the village, the distance range code viz, 'a' for <5 kms, 'b' for 5-10 kms and 'c' for 10+ kms of the nearest where facility is available is given. Column wise details are given below:

ColumnNo. 7-20- Educational Facilities:- All the different educational facilities available in the village have been given under these columns. Nursery/ LKG/UKG classes are included in Pre-Primary Schools, Classes up to class V included in Primary School, Classes from VI to class VIII are included in the Middle School . Classes from IX and X included in the Secondary School. Classes from XI and XII are included in Senior Secondary School. In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively. The information on the entire educational institutes is given under these columns.

Columns No. 21-38-Medical facilities:- All the different medical facilities available in the village have been given under these columns.

Columns No.39-46- Drinking Water:- The information on availability of various types of the drinking water facility within the village has been given under these columns.

Columns No. 47 to 50- Availability of Toilet and others:- The information on availability of toilets and Bio-gas etc. are available in the Village has been given under these columns.

Column 51 to 67- Communication(Post and Telegraph and transport):- The information on communication and Post Office, Sub-Post office & Telegraph office, Village PIN Code number, Phone-Landlines, Mobile Phone,Private Courier Facility, Internet Cafe, etc. available in the village has been given under thee columns. The information on all various transport facilities whether public/private transport like Bus, Railway Station, or Navigable waterways, Taxi, Van, Tractors etc. available in the village has also been given under these columns.

Column No. 68 to 79- Village connected to High ways, Village Roads, banks and Credit societies:- The information on all roads connected to village has

been given under these columns. These includes National Highway, State Highway, District Roads and other district roads connected to the village, Pucca roads, Kutchcha roads, Water Bounded Macadam roads, Navigable Water Ways and Foot Paths has been given under these columns. Further, the information on availability of banks, ATM and Agricultural Credit societies in the village has been given under these columns.

Columns 80 to 96- Miscelleneous Facilities:- The information on various miscelleneous facilities available in the village has been given under these columns. These includes Self-Help Group, Public distribution Shop(PDS), Mandi /Regular Market, Weekly Haat, Agricultural Marketing Society, Nutrition Centre(ICDS), Anganwadi Centre, , ASHA, Community Centre, Sport Fields, Sport Club/ Recreation Centre, Cinema/ Video Halls, Public Library, Public Reading Room, News Paper Supply, Assembly Polling Station, Birth and Death Registration Office.

Columns No. 97 to 100- Electricity:- Availability of Power Supply in the village, whatever may be the form of its use has been given in these columns. These includes Electricity for Domestic use, Electricity for Agriculture use , Electricity for Commercial use, and Electricity for all purpose Domestic Uses.

Columns No. 101 and 102- Nearest Town:- The name of the nearest town alongwith the distance range code has been in these columns.

Land use and Irrigation:- The Land use pattern in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture Government of India. The Ministry has recommended the maintenance of records of land use pattern under the following 9 categories.

(i) Column No. 103- Forests:-This includes all lands classed as forest under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests remain included under the forest area.

(ii) Column No 104- Area under Non-Agricultural use:- This includes all land occupied by buildings, roads and railways or under water, e.g. rivers and canals and other lands put to uses other than agriculture.

(iii) Column No. 105- Barren and un-culturable land:- This includes all barren and unculturable land like mountains, deserts, etc. land which cannot be brought under cultivation except at an exorbitant cost should be classed as unculturable whether such land is in isolated blocks or within cultivated holdings.

(iv) Column No. 106- Permanent Pastures and other Grazing Lands:- This includes all grazing lands whether they are permanent pastures and meadows or not. Village common grazing land is included under this head.

(v) Column No. 107-Land under miscelleneous Tree Crops, etc:- This includes all cultivable land which is not included in ' Net area sown' but is put to some agricultural uses. Lands under Causing trees, thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under 'Orchards' are classed under this categoy.

(vi) Column No. 108- Culturable Wastelands:- This includes lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession is also included in this category at the end of the five years.

(vii) Column No. 109- Fallow Lands other than Current Fallows:- This includes all land which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

(viii) Column No. 110:- Curent Fallows:- This represents cropped area, which is kept fallow during the current year. For example, if any seeding area is not cropped against the same year it may be treated as current fallow.

(ix) Column No. 111- Net Area Sown:- This represents the total area sown with crops and orchards. Area sown more than once, in the same year is counted only once.

(x) Column No 112- Total Irrigated Land Area:- It includes all land which is cultivable and irrigated

by any source of irrigation. The total irrigated area of the village has been given under this column.

(xi) Column No. 113-Total Un-irrigated land Area:- Un-irrigated area includes all land which is cultivable but not irrigated by any source of irrigation. The total un-irrigated land area of the village has been given under this column.

(xii) Column No. 114 to 118- Area irrigated by source:- The area irrigated by various source of irrigation in the village have been given under these columns. The different source of irrigation facilities available in the village are as follows:

i) Canal (C)-Govt. Or Pvt.,

ii) Wells/Tube-wells(W/TW)

iii) Tanks/Lake(T/L),

iv) Waterfall(WF) and

v) Others (O).

Column No. 119 to 121:- Three most important commodities manufactured in the village are indicated in this column.

C.D. Block level totals of the village Directory:-

At the end of entries for the Village Directory of each C.D. Block, the totals of different columns are being given whereever possible. However, in case of some of the columns, it may not be possible to work out the CD Block level totals, in such cases the particular of relevant columns are being left blank against C.D. block level.

Appendices to Village Directory:- The Village Directory also includes the following appendices.

Appendix-I: Summary showing total number of villages having Educational, Medical and other amenities in villages- C.D. Block level.

Appendix -IA: Village by number of Primary schools.

Appendix- IB: Village by Primary, Middle and secondary Schools.

Appendix -IC: Villages with different sources of drinking water fcilities available.

Appendix -II : Villages with 5,000 and above population which do not have one or more amenities available.

Appendix -III:Land utilization data in respect of Census towns.

Appendix -IV: C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V :Summary showing number of villages not having Scheduled Caste population.

Appendix-VI :Summary showing number of Villages not having Scheduled Tribe population.

Appendix-VII A:List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII : Number of villages under each Gram Panchayat (C.D. Block wise).

Note explaining the abbreviations used in Town Directory 2011 Census:-

Statement I:- Status and Growth History.

Column I- Serial Number :- Self explanatory.

Column 2:- Class, Name and civic status of town:- The Class is presented according to population of the towns in 2011 Census as follows:

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below- 5,000	VI

The following abbreviations are used to denote the Civic Status of the town.

Civic Status	Codes
i) Municipal Corporation	M.Corp
ii) Municipal Committee	MC
iii) Municipal Council	M Cl
iv)City Municipal Council	CMC
v) Town Municipal Council	TMC
vi) Municipal Board	MB
vii) Municipality	M

viii) Cantonment Board/ Cantonment	CB
ix) Notified Area	NA
x) Notified Town	NT
xi) Notified Area Committee /Notified Area Council	NAC
xii) Notified Town Area	NTA
xiii) Industrial notified Area	INA
xiv) Industrial Township	ITS
xv) Township	TS
xvi) Town Panchayat	TP
xvii) Nagar Panchayat	NP
xviii) Town Committee/Town area Committee	TC
xix) Small Town committee	ST
xx) Estate office	EO
xxi) Gram panchayat	GP
xxii) Census Town	CT

Column 3-25:- These columns are self explanatory.

Statement II:-Physical Aspects and location of Town, **2009.**

Column 1-2 :Serial number and Name of town:- Self explanatory.

Column 3 to 5 : Physical Aspects :- In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Columns 6 to 12 :- Name and road distance of the town (in kms) from the State headquarters, District headquarters, Sub-divisional/ Taluk/Tahsil/ Police station/ Development Block/Island HQ., Nearest city with population of five lakh and more, Railway station and Bus route is recorded in these columns respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Statement III :- Civic and other Amenities, 2009

Column 1- 2 :Serial number and name of town:- Self explanatory.

Column 3:Road length (in km):- The information about the road length (in km) within the limit of the town is recorded in this column.

Column 4 to 7- System of drainage:- The system of drainage available in the town is indicated in these columns by the following codes.

System of drainage	Codes
Open drains	OD
Closed drains	CD
Both drains	BD

Column 8 to 11-Number of latrines:- The number of various types of latrines available in the town is indicated in these columns.

Column No. 12 & 13 –Protected water supply :- The information on source of water supply and system of water storage with capacity available in the town are given in these columns in the following codes:

Column 12 (Sources of water supply):-

i)	Tap water	T
ii)	Tube-well water	TW
iii)	Tank water	TK
iv)	Well water	W

Column 13 (System of water storage):-

i)	Over Head Tank	OHT
ii)	Service Reservoir	SR
iii)	River Infiltration Gallery	RIG
iv)	Bore well pumping System	BWP
v)	Pressure Tank	PT

The information on 2 major source of water supply is given in column 12 and the system of water storage with capacity against each in kilo-litres (in bracket) is presented in column 13.

Column 14- Fire Fighting Service :- In case the fire fighting service is available in the referent town, 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 15 to 19- Electrification(Number of connections):- Different types of electric connections have been shown in these columns, i.e., Domestic, Industrial, Commercial, Road lighting (point) & others.

Statement IV: Medical Facilities, 2009:-

Column 1-2 Serial number and Name of town:- Self explanatory.

Column 3 to 13 :- The number of various medical institutions such as Hospitlas, Dispensaries, Health Centre, Family Welfare Centre, Maternity and Child Welfare Centre, maternity Homes, T.B. hospital/ clinic, Nursing Homes, Charitable Hospital/ Nursing Home, Mobile Health Clinic and Others as available in the town, are indicated in these columns (along with number of beds in brackets)

If the medical facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 14 – Veterinary Hospital:- The Number of Veterinary Hospitals available in the town is given in this column.

Column 15- Medicine Shop :- The number of Medicine shops available in the town is given in this column.

Statement V: Educational, Recreational and Cultural Facilities, 2009:-

Column 1 to 2- Serial number and Name of town:- Self explanatory.

Column 3 to 15 Educational Facilities :- The information on number of Primary school, Middle school, Secondary school, Senior Secondary school, Arts/Science/ Commerce colleges (of degree level and above), Medical colleges, Engineering colleges, Management Institute/Colleges, Polytechnics, Recognised Shorthand, Typewriting and vocational training Institutions, Non-formal Education Center (Sarva Shiksha Abhiyan Center), Special School for disabled and others available in the town, are indicated in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 to 23- Number of Social , Recreational and Culture Facilities:-

The information on No. Of Home Orphanage, Working women's hostels (with No. of seats in bracket), No. of Old Age Home, Stadium, Cinema Theatre, Auditorium/ Community halls, Public libraries and Reading rooms available in the town are given under these column.

Statement VI:Industry and Banking 2009:-

Column 1-2: Serial number and Name of town:- Self explanatory.

Column 3 to 5: Names of three most important commodities manufactured :- The names of three most important commodities manufactured in the town are given under these columns.

Column 6 to 8- Number of banks :- The number of banks available in the referent town both commercial and Co-operative banks are recorded against these columns.

Column 9 to 10: Number of Agricultural and Non- Agricultural Credit Societies:- The number of Agricultural and Non Agricultural Credit Societies available in the referent town are given in these columns.

Statement VII: Civic and other Amenities in Slums, 2009.

This statement VII provides information on Civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

****

VILLAGE AND TOWN DIRECTORY

Section - I
Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN VILLAGE DIRECTORY

1. Educational Amenities:-

The type of different educational facilities available in the village is given in numbers. Both Government and private educational facilities / institutions are considered for this-purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only three educational institutions. So also in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder:

1.1 Pre-primary (PP):

Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from preprimary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.

1.2 Primary School (P):

Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.

1.3 Middle School (M): Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.

1.4 Secondary School (S): Schools providing education from Standard IX and upwards up to and inclusive of Standard X are classified as Secondary Schools. A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

1.5 Senior Secondary School (SS): Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

1.6. Degree College:

(i) **Arts/Science/Commerce** : These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

(ii) **Engineering College (E**):

It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B. Tech.) or post-graduate engineering degrees like M.Tech.

(iii) **Medical Colleges:**

These are graduate/post-graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D or equivalent in the above branches of medicine.

1.7. Management College/ Institute (MI): It offers courses like Diploma in Management, Post-Graduate Diploma in Management, Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt): An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI: It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC): Non-vocational education centers, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification, and age. These education centers are open to all.

1.11. Special School for Disabled: There are Government and Government recognized institutions/

organizations engaged for providing education to different groups of disabled persons.

2. Medical Facilities:

2.1 Hospital-Allopathic and Hospital-Alternative medicine:

A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31 to 500 depending upon whether these are sub-district, sub-divisional or district hospitals. If there is hospitals providing facilities under different systems of medicines such as, Allopathy, Ayuveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathy: The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b)Ayurveda: Ayurveda means 'Science of life'. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements are represented in the form of Tridosha: Vata, Pitta and Kapha. These three 'doshas' are physiological entities of living beings. Ayurveda developed into eight distinct specialities, i.e., Internal Medicine, Pediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of virility. Two types of treatments, Preventive and Curative, are given in Ayurveda.

(c) Unani: Treatment of Unani consists of three components, namely, preventive, promotive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Artharitis. Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani System emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movement and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d) Homoeopathy: Treatment in Homoeopathy, which is holistic in nature, focuses on an individual's response to a specific environment. Homoeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animal sources. Homoeopathic medicines do not have any toxic, poisonous or side effects. Homoeopathic treatment is economical as well and has a very broad public acceptance.

2.2 Community Health Centre (CHC): Community Health Centres are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas and 1, 20,000 populations for plain areas. CHC is a 30- bedded hospital providing specialist care in Medicine, Obstetrics and Gynaecology, Surgery and Paediatrics.

2.3 Primary Health Centre (PHC): A Primary Health Centre is the first contact point between a village community and the Government medical officer**.** A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor/observation beds. It acts as a referral unit for 6 sub-centres. It has a medical officer and para medical staff.

2.4 Primary Health Sub- Centre (PHS): A Primary Health Sub-centre is the first contact point between the primary health care system and the community. As per the population norms, one PHS is established for every 5,000 population in plain areas and 3,000 population in hilly/ tribal/ desert areas. Each PHS has a sanctioned strength of one male and one female heath worker.

2.5 Maternity and Child Welfare Centre (MCW): It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counseling, delivery, immunization of children with check-up etc.

2.6 TB Clinic (TBC): The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act as referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the district and it also functions as a specialized referral centre. The functions of sub-district level Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7 Health Centre: Clinic where medicine and medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8 Dispensary: Place where patients are treated and medicines provided but with no in-patient facility. Immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9 Veterinary Hospital: Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animals like cows, buffaloes etc in rural areas.

2.10 Mobile Health Clinic: These are Mobile vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated days to deliver the health care services. The services generally offered are OPD, ante-natal and post-natal, B.P. examination, X-ray, ECG, Immunization, First Aid etc.

2.11 Family Welfare Centre: Check-up and counseling is provided to the pregnant and married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12 Nursing Home: A nursing home is a long – term care facility licensed by the state that offers 24-hour room and board and health care services including basic and skilled nursing care, rehabilitation and a full range of other therapies., treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13 Medicine Shop: A shop which sells drugs and medicines of any system of medicine viz. allopathic, homeopathic, ayurvedic or unani medicines, is considered as a medicine shop. Sometimes some shops and Paan shops also keep ordinary medicines, like Crocin, Burnol etc. These shops are not taken as medicine shops.

3. Drinking water: The following are the main source of drinking water facility (ies) available in the village.

3.1 Tap Water-treated: This source of drinking water refers to a source of drinking water which is provided to the villagers through pipes within their premises or to the villagers through common taps (public taps/community water points) by the Government departments, local bodies, panchayats, public or private estate agencies, etc. after treatment. Such a source is treated as 'Tap water from treated source'.

3.2 Tap Water-un-treated: If the villagers are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water, or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as 'Tap water from un-treated source'.

3.3 Covered Well (CW): A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snowmelt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animals cannot fall down the hole. It is considered as covered well.

3.4 Un-covered Well (UW): A well which is (1) un-covered on sides from runoff water, (2) un-covered from bird droppings and animals; or (3) both.

3.5 Hand Pump (HP): Hand pump means where ground water is taken out manually by operating a hand pump.

3.6 Tube Well / Borehole (TW): Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lark are self explanatory.

4. Community Toilet Complex : Community Toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Sauchalaya or likes.

5. Rural Sanitary Mart or Sanitary Hardware Outlet (RSM): It is an outlet dealing with the materials, hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygiene accessories required for individuals, households and the environment in the rural areas.

6. Community bio-gas or recycle of waste for productive use: Many of the solid wastes having economic values but put for disposal can be recycled for reuse. For example, food, cow dung, leaves, vegetable, paper, wood, plastics, old cloth etc. However, some of the wastes are not recyclable. These are carbon paper, thermo coal etc. When recyclable solid wastes is subjected to decomposition, bio-gas could be produced under favourable conditions. These systems of recycling may be there

at the village level organized by Gram Panchayats with technical support from Governments or non-government organizations.

7. Communication and transport Facilities:

7.1 Post Office (PO): Self-explanatory.

7.2 Sub-Post Office (SPO): Sub-post office includes Extra Departmental Post Offices and those providing franchise postal services and also part time services in lieu of some honorarium. The limited postal services include sale of stamps, receipt of letters and money orders and also distribution of letters.

7.3 Post & Telegraph Office (PTO): Telegraph office is set up by the Government to enable people to send or receive telegrams. If the phonogram facility is available (though the Telegraph office may not be equipped with Morse Code Transmitters), the village is considered to be having telegraph facility.

7.4 Telephones (landlines): If the village is having the Public Call Office (PCO) either run by the Post Office or by individuals or by a private shop, then the village is considered to be having telephone facility.

7.5 Public Call Office (PCO)/Mobile PCO: Self explanatory.

7.6 Mobile Phone Coverage: Mobile phones are now very common particularly in urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered to be having access to mobile phone.

7.7 Internet Cafes/Common Service Centres (CSC): If the village is having the facility of Cyber Cafes or shops owned by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of providing all government services in an integrated manner at the door step of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non-IT based services.

7.8 National Highway (NH): These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH-2 for easy identification.

7.9 State Highway (SH): These are roads of a state linking district headquarters and important cities within a State and connecting them with NHs or Highways of the neighboring States.

7.10 Major District Roads (MDR): These are important roads within a district, serving areas of production and markets and connecting these with each other or with the main Highways.

7.11 Other District Roads (ODR): These are roads serving rural areas of production and providing them with outlet to market centres, taluka headquarters, block development head quarters or other main roads.

7.12 Village Road: The approach to village refers to the state of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

7.13. Black-Topped (Pucca) Road (BTR): A road provided with a bituminous surfacing.

7.14 Gravel (Kuchha) Road (GR): A road constructed using well compacted crushed rock or gravel material (coarse sand, small stones), which is fairly resilient and does not become slippery when wet.

7.15 Water Bound Macadam (WBM): This is the road layer made of crushed or broken mixture of sand and rock fragments mechanically interlocked by rolling and voids filled with screening and binding material with the assistance of water.

7.16 Foot Path (FP): A trodden path for the use by pedestrians and in some cases bicycles. The Foot Paths are not suitable for vehicular traffic except bicycles in some cases. Most of the interior/forest villages are connected by Foot Paths.

8. Banks and Credit Societies: - Banking facility means a place where a person can operate a bank account.

8.1 Commercial Bank (CB): These may be banks wholly owned by the Government of India. or by Indian or Foreign Companies.

8.2 Cooperative Banks (Coop. B): A co-operative bank is a financial entity which belongs to its members, who are at the same time the owners and the customers of their bank. Cooperative banks are often created by persons belonging to the some local or professional community or sharing a common interest. These banks are registered under the Cooperative Societies Act. The cooperative banks are regulated by RBI and are covered by the Banking

Regulations Act, 1949. **8.3 Agricultural Credit Society (ACS):** Major objectives of the ACS are to supply agricultural credit to meet the requirements of funds for agricultural production, the distribution of essential consumer commodities, the provision of storage and marketing facilities and for light agricultural implements and machinery. **8.4 Non-Agricultural Credit Society (NCS):** These societies include consumer cooperative societies and also credit cooperative societies of certain categories of persons like teachers, health workers, etc.

9. Miscellaneous Facilities: 9.1 Self-help Group (SHG): Self-Help Groups are groups of between 10-25 women created by either NGOs or under the SGSY (Swarnjayanti Gram Swarozgar Yojana) for the purposes of meeting local credit needs. They are sometimes called Mahila Mandals in villages.

9. 2. Public Distribution System (PDS) shop: The shops through which some essential commodities are sold by the government at subsidized rates. They may also be known as ration shops and control shops.

9.3. Mandis/Regular Market: These are those clusters of shops with or without fixed premises which are open on at least six days a week and opens at least from morning hours to dusk.

9.4. Weekly *Haat*: These are those clusters of shops with or without fixed premises which are open once a week.

9.5. Agricultural Marketing Society: It is a common platform to analyse the issues among all the individuals and institutions in the field of agricultural marketing.

9.6. Nutrition Centre: Integrated Child Development Services (ICDS): The Integrated Child Development Services (ICDS) Scheme set up by the Government of India with the objective of providing following package of services to the children under 6 years and pregnant and lactating mothers in villages such as; Immunization, Health Check-up, Referral Services, Pre-school Non-formal Education and Nutrition & Health Education.

9.7. Anganwadi Centre: Each centre under the ICDS scheme is run by an Anganwadi Worker. One Anganwadi worker is appointed for specified population of the village. They are basically local women. They are assisted by Anganwadi helper. They provide pre-school non-formal education at the Centre and provide food to the children.

9.8. Accredited Social Health Activist (ASHA): ASHA is a health activist in the community who will create awareness on health and its social determinants and mobilize the community towards local health planning and increased utilization and accountability of the existing health services. She would be a promoter of good health practices. She will also provide a minimum package of curative care as appropriate and feasible for that level and make timely referrals. She will act as a motivator of different types of health related activities. Unlike ANM, she will not be involved in any clinical activities like immunization.

9.9. Sports Club/Recreation Centre: Indoor and out-door games are arranged by the Club and activities like wrestling, Judo Karate etc. are also done there.

9.10. Cinema/Video Hall (CV): If regular cinema houses licensed by Government is available, then the town/village is considered to be having the facility of Cinema Hall. Video hall owners screen films in their own or hired premises.

9.11. Public Library: Books are kept there which can be accessed by the public on loan basis. These may be sponsored by Government or Local Body or Panchayat or any influential person. Free service or nominal charges are made for using the facility.

9.12. Public Reading Room: Here the public may read newspapers and magazines. These may be sponsored by Government or Local Body or Panchayat or any influential person.

9.13. Newspaper Supply: The availability of the Newspaper(s), both in English or vernacular, in the village is considered to having the said facility.

10. Availability of Electricity/Power. If power is actually available, whatever may be the form of its use, it is indicated affirmative. If the village is having electricity for domestic purposes and the residents are using the same for domestic use, then it is considered that domestic power supply is available. If the electricity authority has not given domestic supply to the households on their request and people are using unauthorized electricity either by stealthily or misuse the supply meant for agricultural or industrial purposes, then it is not considered as availability of electricity for domestic purposes. However, if the village goes out of power due to temporary technical problems such as, transformer failures, theft of electrical equipment, etc., it is considered that electricity is available. Supply of electricity is considered available even when there is a temporary

ban on new domestic connections. Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial basis, charitable, educational and religious institutions are included in the domestic category.

10.1 Power Supply for domestic use: This category includes electricity used only for domestic consumption.

10.2 Power supply for agricultural use: This category includes all electricity connections given to the farmers for conducting various agricultural activities including irrigation.

10.3 Power supply for commercial use: This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

10.4 Power supply for all uses: This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

11. Land Use Pattern: The land use area of the villages is given in hectares. The land use pattern in the Village Directory conform to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

12. System of drainage : Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

13. Type of latrines: The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine. **(i) Pit System:** The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine. **(ii) Flush/pour flush:** A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used). (iii) **Service:** Type of latrine from where night soil is removed manually by scavengers. All other types of latrines are covered under "Others" category.

14. Protected Water Supply- Source and capacity of Storage system: There are various sources of water supply and its storage system in the tow

14.1 Service Reservoir: A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

14.2 River Infiltration Gallery: Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too shallow for **intake screens**. Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

14.3 Bore Well Pumping System: A bore well is a well of 6" to 12" in diameter drilled into the earth for retrieving water. The depth of a bore well can vary from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

14.4 Pressure Tank: Tank that is used to ensure consistent water pressure and for storage of water. Usually located in basement of house but sometimes (in older settings) located in well pit.

15. Road lighting (Points): Road lighting means the number of street lights that are maintained in the town.

16. Home Orphanage: Orphanage is the name to describe a **residential institution** devoted to the **care** of **orphans** – children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a **ward of the state**, and orphanages are a way of providing for their care and housing.

17. **Working women's hostel:** These may be recognised or non-recognised by any public authority. The data on number of working women's hostels available in the town are collected with number of seats.

18. **Old Age Home:** There are two types of Old Age Homes in India. One is the "Free" type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the "Paid" home where care is provided for a fee. Nowadays, such "Retirement" homes have become very popular in India and they are well worth considering.

19. **Stadium:** A stadium is a place, or venue, for (mostly) outdoor **sports**, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

20. Auditorium/Community Hall: These are the places where meetings, social functions etc. are organised.

(a) List of villages merged in towns and outgrowths at 2011 Census

There is no cases of Villages merged in towns and outgrowths in Kamrup district during Census 2011.

Data is not finalised yet

****

TOWN DIRECTORY

Town Directory:

There are seven statements in the Town Directory. These statements have been compiled from the information supplied by the local bodies of the State and the contents thereof are as follows:

Statement I:

This statement gives class, name and civic administration status of the town and its location code which runs into eight digits, name of tahsil, name of C.D. block in case of non- municipal (Census) towns, number of households, population and decadal growth rate of the towns 1901-2011 density of population and sex ratio for the last three decadal Censuses.

Statement II:

This statement provides data on physical aspects viz. Rainfall, temperature of towns, location of town with respect to its distance from State/district/tahsil headquarters, from the nearest city/railway station/ bus route, etc.

Statement III:

This statement indicates civic and other amenities available in each town of the district. The details given under civic and other amenities includes availability of road length in km, both kutcha and pucca, system drainage, number of latrines and method of disposal of night soil, protected water supply, fire fighting service and number of electric connections available in the town.

Statement IV:

Statement IV explains the states of medical facilities in each town. The medical facilities cover number of hospitals (allopathics & other)/ dispensaries/health center/ family welfare/ maternity and child welfare centers.

Statement V:

Statement V explains the status of medical, educational, recreational and cultural facilities in the town. The medical facilities cover number of hospitals/ dispensaries/TB clinics. The number of beds available under each type of medical institutions is also given. Similarly, the educational facilities shown include availability of Arts/Science/Commerce/ Law/ Other colleges of degree level and above, medical colleges, polytechnics, shorthand, typewriting and vocational training institutions, higher secondary/intermediate/ PUC/Junior college level , secondary/matriculation, junior secondary/middle school, primary school and adult literacy classes/centres. This statement also includes information on working women's hostels along with number of seats and number of recreational and cultural centres, like stadium, cinema, auditorium/ theatre/community halls, public libraries ,reading rooms etc.

Statement VI:

This statement deals with industry and banking data in 2009. Townwise information is depicted on three most important commodities manufactured, commercial, co-operative banks and number of agricultural and non-agricultural credit societies in each town.

Statement VII:

In view to collect an exhaustive information in slum demography etc., this separate statement has been introduced. Slum data collected in this statement will be used as an aid and tool for urban planning of the towns. Various types of information viz., name of the slum area, total number of households and population of the slum areas, availability of paved roads(in kms) in the slum area, system of sewerage, number of latrines (private and community) available, method of disposal of night soil, number of tap points installed for the supply of protected water and electric connections available for domestic road lighting and other purposes have been collected in this statement.

STATEMENT - I

Statement 1 : It gives the information regarding the Status and Population Growth History of the Towns under the C.D. Blocks in Kamrup district. It gives Area, Number of Households including Houseless Households and Population of SCs/STs. The highest Density of 4782 is seen in Palashbari (MB) and highest Sex Ratio of 1049 is foud in Parlli Part (CT). The lowest Density among the towns is 961 and found in Parlli Part (CT) and lowest Sex Ratio of 895 is seen in Udiana(CT)

STATEMENT-II

@Two major source only

Abbreviation

TT: Tap water from treated source
TU: Tap water from un-treated source
CW: Covered well
UW: Un-covered well
HP: Hand pump
TW/B: Tubewell /Borehole
RW: Rainwater
S:Spring
TK/P/L: Tank/Pond/Lake
O:Others
OHT: Over head Tank
SR: Service Reservoir
RIG: River Infiltration Gallery
BWP: Bore Well Pumping system
PT: Pressure Tank
N\A,NA,N.A.: Not Avialable

Statement III: It gives the Civic and Other Amenities in the towns such as Road Length, System of Drainage, Number of Latrines, Protected Water Supply, Fire Fighting Service and Electrification. It is seen that Road Length is longest with a length of 48.7 KM in Rangia (MB) and shortest with a length of 3 KM in Parlli Part (CT). Drainage System is both-Open & Closed in some while the rest of the towns have Open Drainage System only. Number of Pit System is highest in Rangia(MB) having 1246 Pit Systems; on the other hand it is lowest in Udiana (CT) having 207 Pit Systems. Many towns have the facilities of Over Head Tanks (OHT) and Tap Water from Treated Sources (TT). Apart from this, the facility of Tube well/Borehole (TW/B) and Hand Pump is also found. Fire Fighting Service is available in most of the towns as reported. Domestic Electrification is there in all the towns whereas Industrial as well as Commercial Electrification, Road Lighting (Points) and other electrifications are not so widespread.
