Foreword	i- -ii
Preface	iii
1. Map of the District	v
2. Analytical Note :	
Census concepts, Brief history of the district and District Consus Handbook, Scope of Village and Town Directory, Physical Aspects, Major Characteristics of the district particularly in relation to the economic resources, Brief note on places of religious; historical or archaeological importance and tourists, interests, Brief analysis of the data of village and town directory.	1 -15
3. **Section 1—Village Directory**	
Note explaining the codes used in the Village Directory	19
List of villages in each police station arranged in alphabetical order followed by Village Directory Statements.	
1. Katigora	23—43
2. Barkhola	44—57
3. Udarbond	58—71
4. Lakhipur	72—97
5. Silchar	98—123
6. Dholai	124—133
7. Sonai	134—143
8. Karimganj	144- 177
9. Badarpur	178- 195
10. Patharkandi	196—223
11. Ratabari	224—255
12. Hailakandi	256—271
13. Lala	272--281
14. Katlichara	282—297

Appendix I : Police Station wise abstract of educational, medical and other amenities. 298—302

Appendix II : Land utilisation data in respect of Non-municipal Towns. 302

Appendix III : Police Station wise list of villages where no educational, medical, post and telegraph, market/hat, communication and power supply facilities are available. 302—307

4. **Section II—Town Directory** 309—325

Note explaining the codes used in the Town Directory

Statement I : Status and growth history

Statement II : Physical aspects and location of towns, 1979.

Statement III : Municipal Finance, 1978—1979.

Statement IV : Civic and other amenities, 1979.

Statement V : Medical, Educational, Recreational and Cultural facilities, 1979.

Statement VI : Trade, Commerce and Banking, 1979.

5. Maps of the Police Stations.

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. It provides useful data on infrastructure and amenities in villages and towns.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH Series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states Part-C was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural area. It is expected to help not only in local area planning but regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. A few new items of the information have also been introduced to meet some of the requirements of the Revised Minimum Needs programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums.

Since the 1981 Census could not be conducted in Assam, only Part-A containing village and town directory is being published for the State. Further, even in Part-A some of innovations introduced in the 1981 DCH series in other States which were based on census data have been dropped. At the beginning of the village and town directory an analytical note supported by inset tables based on non-census data in relation to the infrastructure has been introduced to make it more useful. The district and police-station level maps depicting the boundaries and other important features have been inserted at appropriate places to enhance the utility of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri N. K. Choudhury, IAS., the Director of Census Operations, Assam on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Dr. N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map), provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi
2nd September, 1983.

P. PADMANABHA
Registrar General, India.

PREFACE

The District Census Handbook (DCH) which constitutes one of the most important census publications, made its first appearance in 1951 and was immediately acclaimed by a large section of academicians, administrators, planners, policy-makers, researchers, scholars and many non-governmental agencies.

The form of DCH has undergone considerable changes since 1951 to accommodate more and more information as demanded by the actual users of the handbooks.

The 1981 Census publication programme envisaged publication of DCH in two parts : Part A related to Village and Town Directory and Part B to General Population Tables, Village & Town-wise Primary Census Abstract (PCA) and PCA for Scheduled Castes and Scheduled Tribes.

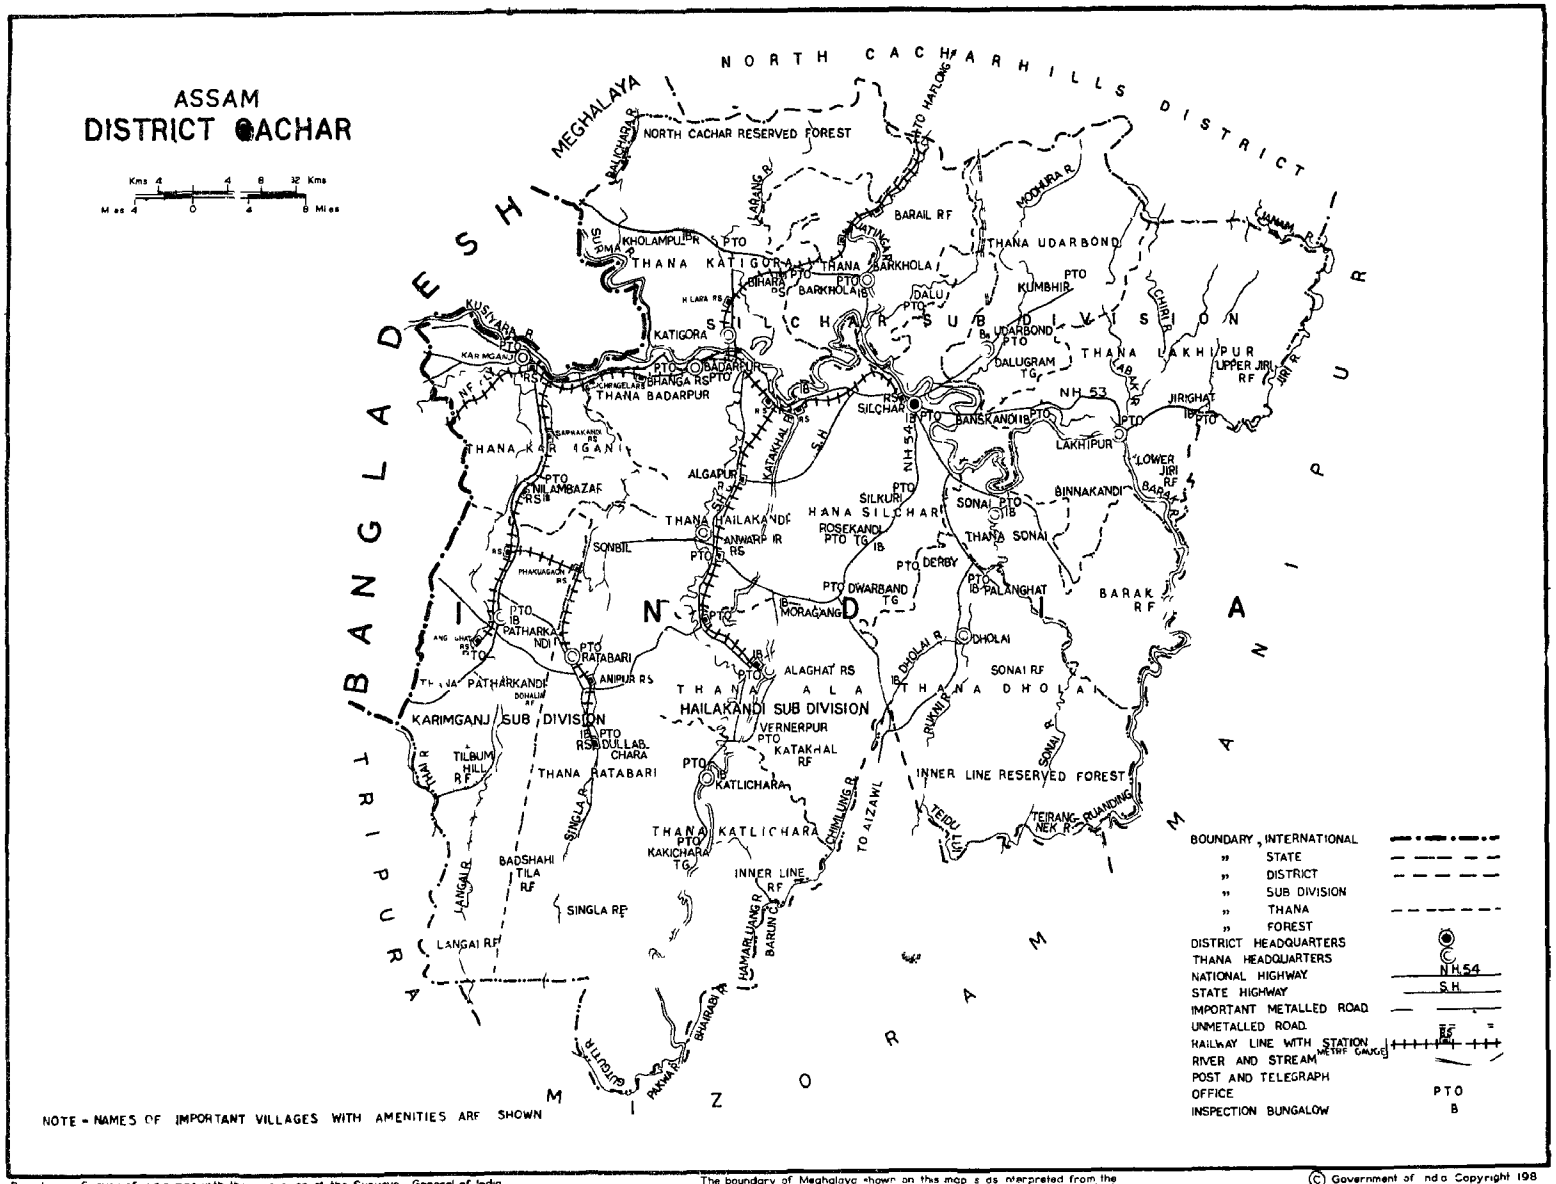

Since the 1981 Census could not be conducted in Assam we have to restrict publication of our DCH to Part A only. Further, even in Part A, some of innovations introduced in the 1981 DCH based on census data could not be incorporated.

The data presented in this volume had been collected and compiled under the guidance of of Shri N K. Choudhury, who was Director of Census Operations, Assam till January, 1983. The tables and statements have been prepared by a team of dedicated workers in this office who have worked wholeheartedly on the job. Shri N. Bhattacharjee, Assistant Director (T) besides being in overall charge of supervision has prepared the analytical note in which he was ably assisted by Shri N.C. Sen, now Assistant Director (T) in Nagaland Census Directorate. Shri S. K. Bora and Shri S. K. Barua, Investigators have rendered yeoman's service in all stages of production of this handbook. Dr. R. Kumar, Geographer has done commendable job in preparation of the maps of district and police stations. We are grateful to Dr. N. G. Nag, the then Deputy Registrar General (Social Studies) and Dr. B. K. Roy, Deputy Registrar General (Map), India for all the assistance we received from them in preparation of the tables and statements and drawing of District and Police Station maps.

Above all, we are deeply indebted to Shri P. Padmanabha, ex-Registrar General, India and Shri V. S. Verma, present Registrar General, India for their unfailing guidance and constant inspiration in bringing out this publication.

Guwahati
December 1, 1987

J. C. BHUYAN,
Deputy Director of Census Operations,
Assam.

NOTE - NAMES OF IMPORTANT VILLAGES WITH AMENITIES ARE SHOWN

Based upon Survey of India map with the permission of the Surveyor General of India
The Indo Bangladesh boundary shown on this map is the one existing prior to the conclusion of the agreement on May 16 1974 between India and Bangladesh

The boundary of Meghalaya shown on this map as interpreted from the North Eastern Area (Reorganisation) Act 1971 but has yet to be verified

ANALYTICAL NOTE

Concepts

Though the 1981 Census could not be conducted in Assam, the census concepts as adopted in other parts of the country are discussed in the following paragraphs.

Rural and Urban Areas

The classification of the population of a country as rural and urban at a census is a well-recognised dichotomy all over the world. But in view of varying conditions between country to country it has not been found possible to have a uniform definition that can be universally applicable to all the countries.

The basic unit for rural areas in 1981 Census of India is the revenue village which has definite surveyed boundaries. The revenue village may comprise several hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed villages within forest or hilly areas each habitation area with locally recognised boundaries is treated as one unit.

Urban areas are specially defined for census purposes. In the 1981 census, the same criteria as adopted in 1961 and 1971 censuses are adopted with minor variation. Urban areas in the 1981 census are:—

(a) All places with a municipality, corporation, cantonment board or notified town area;

(b) All other places which satisfied the following criteria.;

(i) A minimum population of 5,000;

(ii) At least 75% of the male working population engaged in non-agricultural (and allied) economic pursuit;

(iii) A density of population of at least 400 per square kilometre (1000 per square mile).

The urban criterion of 1981 varies slightly from that of 1961 and 1971 censuses in that the males working in activities such as fishing, hunting, logging etc. were treated as engaged in non-agricultural activity during those censuses, whereas in 1981 census these activities are treated as on par with cultivation and agricultural labour, i.e. agricultural activity for the purpose of this criterion.

Apart from the criteria enunciated above, the Directors of Census Operations were given some discretion in respect of some marginal cases to include, in consultation with State Government, some places that had other distinct urban characteristics and also to exclude certain which can no longer be treated as urban according to 1981 criteria.

Census House :—A census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household :—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of circumstances prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. These are called "Institutional Households". There may be one member households, 2 member households or multimember households. For census purposes, each of these types is regarded as a household.

Scheduled Castes and Scheduled Tribes

The lists of Scheduled Castes and Scheduled Tribes were notified for the first time under the Constitution (Scheduled Castes) Order, 1950 and the Constitution (Scheduled Tribes) Order, 1950. These lists have been modified or amended or supplemented from time to time. On the reorganisation of the States, the Scheduled Castes and Scheduled Tribes (Modification) Order came into force from October 29, 1956. Thereafter, a few orders specifying Scheduled Castes/Tribes in respect of a few individual states also came into force.

Literate

A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

Main worker

Main worker is a person whose main activity is participation in any economically productive work for at least 183 days or more during one year preceding the date of enumeration considered as the reference period. Such participation may be physical or mental in nature.Work involves not only actual participation in work but also effective supervision and direction of work.

Marginal worker

Marginal worker is a person who has been participating in some work during the preceding one year but such participation is only marginal and not for the major part of the year.

Non-worker

Non-worker is a person who has never done any work during the last one year prior to the date of enumeration. Non-workers are divided into seven categories. The symbols which have been used to indicate these categories are given against each category.

(i) Household duties	..	H
(ii) Students	..	S
(iii) Dependents	..	D
(iv) Retired persons or rentiers	..	R
(v) Beggars, etc.	..	B
(vi) Inmates of institution	..	I
(vii) Other non-workers	..	O

BRIEF HISTORY OF THE DISTRICT

The district of Cachar is bounded on the north by the district of North Cacharhills and the State of Meghalaya; on the east by the Manipur State; on the south by Mizoram and on the west by the State of Tripura and the Sylhet district of Bangladesh. The district is situated between longitude 92·15′ and 93·15′ East and latitude 24.8′ and 25.8′ North and covers an area of 6962.0 km^2.

Origin of the name

The dynasty of Kachari Kings originated from an ousted prince of Kamarupa who finally settled down in this place. Mr. Gait is of the opinion that the Kacharis gave their name to this district of Cachar. It is also possible that the Bengalis of Sylhet district gave this name to the district as the word 'Kachar' in Sylhetee means a stretch of land at the foot of a mountain.

The Kacharis

The Kacharis of Cachar, or Dimasa, as they call themselves, are generally supposed to be a section of great Bodo horde. This populous and powerful race is said to have its origin somewhere between the upper waters of Yan-tse-kiang and the Hoang-ho. They came down to Assam in successive waves and had even penetrated as far south as Tippera Hills. Gradually, their population increased in great numbers and they travelled both by land and water to 'Nilachal' the hill near Gauhati on which the temple of Kamakhya

stands. From Nilachal they moved to Halali and finally settled at Dimapur. Copper-plates ascribed to 10th and 11th centuries A.D. state that the descendants of Narak, one of the earliest kings of Kamarupa, were overthrown by Cala Stambha, a foreign conqueror. Cala Stambha was succedeed by twenty other foreign kings, and the basic of Narak was then restored in the person of Brahmapala. It thus seems possible that the Dimasa may for a time have ruled at Gauhati. At the beginning of 13th century they occupied the western part of Sibsagar and a large part of Nowgong district. The ruins of Dimapur still show that the town must have been the seat of a tribe far in advance both in power and civilization.

The Ahoms, a race of people of the great Shan-Thai family migrated to Assam in the beginning of the 13th century A. D. Being harassed by Ahoms, the Kachari King decided to abandon Dimapur and moved his capital south-west to Maibong on the Mahur river with the hope that the Ahoms would be unable to follow him through the jungle-covered hills to his new abode. The king Megha-Narayanee built up a palace-cum-temple of bricks and stones with a well-built gate, probably of the Dimapur pattern. Two stone tablets dated 26th day of Ashara (July-August) in 1498 Sakabda (1576 A. D.) bear the king's name and mention the completion of stone-built royal gate. The remains of brick ruins, rock sculptures and dense groves of bamboos show that Maibong must have been a thriving place of the Kachari kingdom. The Kachari king was however wrong in supposing that he had passed beyond the sphere of Ahom influence. In 1706, Rudra Singh, one of the most powerful of their princes despatched an expedition into the hills. The army numbered no less than 37,500 men and the Kacharis were unable to withstand the attack of such a powerful force. Maibong was taken and sucked by the Ahom army.

The Kachari king Tamradhwaj fled southwards to Khaspur and hearing that the Ahom troops had suffered severely from sickness during the rains, appealed to the Jaintia Raja for help to recover his lost territory. But unfortunately he was treacherously seized by the Jaintia King. Means were however, found of applying to the Ahom King for help which was not refused. A strong force was sent through both the North Cachar and Jaintia Hills, which captured both the princes and conveyed them to the Brahmaputra Valley. The Kachari King was stationed near Bishnath and finally sent back to his own country with ten elephants and a supply of guns, gun-powder and other implements of war. He took up his abode at Khaspur but shortly afterwards was attacked by a mortal disease and breathed his last in 1708 A. D. The Kachari King Suradarpa Narayan set himself to re-organise the people and improved the Capital. Brick-built palaces and temples were constructed in different parts of Khaspur and the Kingdom was named Haidimba Kingdom. All the Kacharis living in different parts of Assam owned moral allegiance to the lord of Khaspur.

The Brahmins and high class people from Cooch-Behar, Tipperah and Sylhet flocked to the Royal court seeking employment and the king patronised them all. Immigrants from Sylhet, Bengal and other parts of India were also encouraged to settle in the newly established kingdom. Cultivators were encouraged to encroach on the Tipperah territory to the south in the Dhaleswari Valley which was a slopping highland.

Mr. Soppitt gives 1750 as the year in which the Kacharis migrated to the plains of Cachar. During the reign of Dharmadhwaj or his successor Kirti Chandra, the Kacharis moved from Maibong to the plains of Cachar. Two reasons are assigned for this migration ; one that Dharmadhwaj had married the daughter of the king of Hill Tipperah and had received the upper valley of the Barak as dowry. The other was that the Kacharis were attacked by the Jaintia king on the west. The account given by the Ahom chronicles seems to be more acceptable. It was only natural that the king, having been once driven to the plains by the Ahoms, should remain there in preference to returning to Maibong, a place which had been destroyed.

The first connection of the British with the district dates from 1762, when Mr. Verelst marched from Chittagong to assist the Manipuri King Jop Singh who had been driven from his throne by the Burmese and halted with his army at Jatrapur near the present Silchar town. The army remained there for about a year but due to death and disease amongst the army and due to the difficult route to Manipur, Mr. Verelst could not proceed further and was ultimately recalled.

The next historical event of importance was the formal conversion of king Krishna Chandra to Hindusim in 1790 A. D. According to Mr. R. M. Nath some shrewd Brahmin priests of Sylhet declared the king to be pure Hindu by making him take a new ceremonial birth from the womb of a golden cow specially made for the purpose, which of course, they afterwards apportioned amongst themselves by pieces. But the old religious preceptors following the king from Assam did not give up their hold and the Vaisnava sacred books Naradiya Purana was translated by Bhubaneswar Bachaspati (1733) into the spoken dialect while the holy Bhagavata Purana was read and explained daily in the royal court.

A few years latter, the last prince Godinda Chandra was driven from the throne by Marjit Singh of Manipur with the help of the Burmese. Afterwards the Burmese drove Marjit Singh from this place to the Surma Valley. The Burmese then threatened to annex Cachar, but the British Government which was in possession of Sylhet, was unable to permit a powerful nation to extend its territory right up to the frontier of Sylhet. Taking the side of the Kachari king, they expelled the Burmese, and handed back the district to Godinda Chandra. In return for their assistance he was required to pay an annual tribute of Rs.10,000 which proved somewhat heavy upon the resources of country. The king then took up his abode at Haritikar but in 1830 he was assassinated by a batch of Manipuri marauders, very likely at the machination of the Manipuri king Gombhir Singh. In the absence of natural heirs his territory lapsed to the British Government under the term of a treaty executed in 1826. This district was formally annexed by the proclamation of August 14,1832.

A large portion of the North Cachar hills had however been seized by a man called Kacha-Din (Kahidan) who had originally been one of the King's table servents. He was led astray down into the plain and killed, but his son Tula Ram succeeded in holding his own against the various attacks made upon[s] him. In 1829 Godinda Chandra was induced by Mr. Scott, the Agent to the Governor General on the north-east frontier of Bengal, to recognise his independance and assign him a separate fief. This territory was subsequently resumed by the British Government in 1854 in consequence of the misconduct and in capacity of Tula Ram and his descendants.

During the Kachari reign numerous emigrants of Bengalis came from Tipperath, Mymensing, Rangpur and Sylhet to Cachar and settled there. With the establishment of the British rule there was a further wave of such immigrants in connection with administrative affairs.

BRIEF HISTORY OF DISTRICT CENSUS HANDBOOK

The District Census Handbooks were first introduced in 1951 Census. Prior to 1951, Village statistics for district used to be printed after the census giving the population for each village and showing the distribution of communities and of literate persons. The District Census Handbooks in 1951 contained data on area, houses and population, small scale industries, distribution of population by livelihood classes for each village and town of the district and many other census tables. In 1961 Census, the scope and contents of the District Census Handbooks were enlarged by including more census tables and also the administrative statistics which included information on rainfall and temperature, vital statistics, land utilization and agriculture, livestock, industries, administration, public health and medical etc.

In 1971 Census further improvements were made in District Census Handbook by incorporating more informations on Villages and Towns in the form of Village and Town Directory. The District Census Handbook of 1971 was divided into three parts and the part-A included the Village and Town Directory. The Village Directory contained information on area, educational, medical, power supply, drinking water, communication, post and telegraph, staple food, land-use pattern, nearest town and its road distance from the village, day or days of hats and markets etc.

The Town Directory comprising seven statements included data on (i) Status, Growth history and functional categories of each town (ii) Physical aspects and their location (iii) Municipal finance (iv) Civic and other amenities (v) Medical, educational, recreational and cultural facilities (vi) Trade and commerce, Industry and Banking facilities and (vii) Population by religion. Part-B presented data on primary Census Abstract like area, census houses and households, population, Castes and Tribes, literate and educated persons, workers by industrial categories and non-workers for each village and each block and ward of town.

Part-C included Census tables, secondary tables based on Village Directory and Primary Census Abstract data and tables relating to administrative, welfare and development activities.

In the 1981 Census, the District Census Handbook is divided into two parts. Part-A includes data on Village and Town Directory covering information on a few more items in addition to the information covered in these directories in 1971 Census. Part-B includes the Village and Town-wise Primary Census Abstract. This part of the District Census Handbook will not be published in case of Assam as there had been no census in the state during 1981.

SCOPE OF VILLAGE DIRECTORY & TOWN DIRECTORY STATEMENTS

The information on Village Directory was confined to a single column in 1961 Census which showed amenities available in each village like transport and postal facilities, educational institutions, drinking water supply, bazar day and medical facilities, veterinary facilities and whether the village is covered by C.D. blocks or N.E.S. blocks. The scope of village directory was enlarged in 1971 census which included information on area, amenities available in the village such as medical, power supply, etc. which are detailed in earlier paragraphs. In 1981 Census, two more columns are added to the Village Directory. Column 4 gives information on total population and number of households and col. 11 gives information regarding approach to the village. All the six statements of Town Directory included in 1971 census have been retained in 1981 Census. In addition to that a new statement-IV-A giving information on "Civic and other amenities on notified slums during 1979" has also been introduced. However, as in case of Cachar district there is no notified slum area this table has been dropped from the purview of this handbook.

PHYSICAL ASPECTS

The Cachar district is a heterogeneous land composed of both high hills, low lands and level plains. The general appearance of this district is extremely picturesque. On the north,east and south it is shut in by ranges of purple hills whose forestclad sides are seamed with beautiful landscapes. The Silchar subdivision includes the southern section of the Assam range and a belt of hilly country with an average width of six to seven miles, containing peaks between three to four thousand feet in height. The Bhuban range on the eastern frontier covers a considerable area, and rises in places to over 3,000 feet above the level of the sea, while the Saraspur hills on the west of the Hailakandi valley stretch in a continuous line to the Barak. Almost the whole of the country north and south of the river Barak is dotted with low-ranged isolated hills called "tillahs" which rise from the level of alluvial soil. The Barail hills on the north strike the head-water of the Larang and the Kayang nalas and culminate in the peaks of Kalangtam, Sharpal and Dolla. Low hills crept up here and there rising like rocky islets, and in one direction or another, mountains always come in view. To the south much of the country is still covered with primeval forest. Further north the higher lands are planted with tea, while the lower levels are covered with rich crops of waving rice. The river Barak flows through the centre of the plain valley region. Here and there swamps and beels, with clumps of elephant, grass and reeds lend variety to the view. Most of the arts of the Barak's banks are lined with villages covered in groves of slender areca palms, broad-leaved plantains and feathery bamboos, and in all seasons of the year, the country looks fresh and green. The hills on the southern part of this district are covered with dense ever-green forest and bamboo jungle.

There is no jurisdictional change in the district boundary of Cachar during the decade 1971-81. But the boundaries of a few police stations have undergone some changes during the decade as two more police stations have been created during this period. The Dholai police station was carved out of Sonai and Silchar police station of Silchar Sub-division of this district vide Government Notification No. HMP.407/73/24 dated 21-2-75. The other new police station of Lala was carved out of the Hailakandi and Katlichara police station of Hailakandi Sub-division vide Government Notification No. HMP.245/75/35 dated 31st July, 1979. There is, however, no geophysical events of note in the district during the last decade.

MAJOR CHARACTERISTICS OF THE DISTRICT PARTICULARLY IN RELATION TO THE ECONOMIC RESOURCES

Electricity and Power :—Cachar district does not generate any electricity and depends entirely upon supply from outside. Under the rural electrification scheme 623 villages of the district have been provided with electricity covering a population of about 9 lakhs till 1981. A total of 148 pumpsets have so far been energised with electricity thus greatly benefiting the peasants in irrigating their land under cultivation. A total of Rs.305.99 lakhs have been earned by the ASEB through supply of electricity for domestic and commercial uses in the district during the year 1982-83

Agriculture :—The soils of this district in the Surma Valley are not much different from those of the Brahmaputra valley. It is characterised by an abundance of marshes and low lands, the soils of which contain a large percentage of organic matter. The final forecast area for cultivation of differeo varieties of paddy in the district during 1981-82 is as shown below:

Crop	Subdivision			Total for District
	Silchar	Karimganj	Hailakandi	
(1)	(2)	(3)	(4)	(5)
Ahu	16,330 Hec.	17,090 hec	9,000 hec.	42,420 hec.
Boro	4,410 "	2,760 "	600 "	7,770 "
Sali	72,100 "	47,300 "	33,000 "	152,400 "

Fisheries : The potentiality of fisheries development in the district comprises of rivers, beels, swamps, tanks and ponds. In the tea estates of the district there is scope for developing pisciculture to a great extent as there are enough marshy lands which are difficult to be used for any other purposes.

Originally the seeds were obtained from natural sources where mixed seeds both of economic and uneconomic varieties were available. These seeds were sold to the individual parties by the fishermen and the result obtained after some years was disappointing,. With the introduction of induced breeding operation where a particular variety of fish is induced for breeding, the problem of mixed fry has been avoided. The breeding of the Indian major carp in flowing water is the main factor which has been remedied by inducing the fish to breed in confined water also.

An exotic variety of fish viz. common carp has been introduced into the district. The advantage of this over the Indian major carp is that it breeds in confined water naturally and can breed more than once in a year.

The culture of fish by individual fisherman is found to be encouraging and this is due to the distribution of seeds by the Department of Fisheries. During the year 1980-81 about 1,064,300 seeds have been distributed amongst the pisciculturists and about 180,000 seeds kept as reserve stock in the departmental tank of the Department of Fisheries. The earnings of the department through sale of fishes during the year 1980-81 is reportedly Rs.79,822.00.

The following development schemes are implemented by the Department of Fisheries for development of fisheries in the district.

(i) Fish seed production.

(ii) Fish production through composite fish culture, intensive fish culture, paddy-cum-fish culture, fish-cum-duck culture, fish-cum-pig culture, air-breathing fish culture.

(iii) Development of beel fisheries.

(iv) Applied nutrition programme.

(v) Assistance to private pisciculturists for (a) inputs and (b) reclamation of tanks and ponds.

(vi) Fish farmers' development agency (Centrally sponsored scheme)

There was a total of 127 fish mahals in Cachar during 1979-80 out of which 69 were recorded as registered 'Beel' fisheries and 58 as registered river fisheries. 5.87 million of spawn and 1.23 million of fry and fingerlings were produced in the district during this period.

Industry :– There are no heavy industries in the district of Cachar except the age-old tea industry. The existing industries of the district can be classified mainly into (i) food and kindred products, (ii) forest products, (iii) manufacturing excluding transport equipment and (iv) cotton textile. Cachar registers 114 factories engaged in manufacture of food products. There are 13 rice-mills in the district out of which one is owned by the Government. There is a roller flour mill at Meherpur, Silchar, a sugar mill at Chargolla and a Veneer mill at Durlovcherra, Karimganj. Tea which forms a major industry in the district has 89 factories for its processing and those are dispersed throughout the tea plantation areas. A total of 115 tea estates covering an area of 31,669 hectares employ 54,918 persons in this district which yielded about 28,286,000 kgs. of leaf in the year 1979. Saw mills numbering 27 in the district deserve mention.

There are 535 units within the ambit of small scale industries in Cachar district manufacturing sundry products Katakhal, within the Hailakandi sub-division is widely known for the 'Sitalpati' artisans.

Animal Husbandry and Veterinary :- As per livestock census conducted in Assam during 1979 the population of livestock in Cachar district is as follows:

(a) Cattle—595,363, (b) Buffaloes—120,996, (c) Sheep—4,289, (d) Goats—220,468, (e) Horses and Ponies—335, (f) Pigs- 14,874, (g) Ducks- 422,954, (h) Fowls—1,251,532.

There are 5 veterinary hospitals, 24 dispensaries, 9 Development Bloock dispensaries, 1 mobile dispensary and 52 first-aid-centres, 350,265 heads of livestock and 138,494 poultry have been treated during 1980-81. The number of livestock castrated during this period is 39,108 and those vaccinated are 96,076 heads of livestock and poultry numbering 226,853.

Transport : The district is connected with the rest of state by railways, road and air. The total number of motor vehicles on road in Cachar as recorded in 1980 is 6,609. Public carriers constitute the largest number (956). Motor cars and cycles and scooters number 874 and 853 respectively. Next in numerical strength comes the private carriers numbering 694.

It is relevant to note here that the total road length maintained by the P.W.D. within the district is 1,730 kms during 1979-80 out of which 344 kms. are surfaced and the remaining 1,386 kms. are gravelled. Silchar subdivision claims the highest road length (804 kms.). Karimganj and Hailakandi subdivision have 576 and 350 kms. of road respectively. On an average Cachar claims 24.85 kms. of road (under P.W.D.) per 100 sq. kms of area.

Forestry : The forests of Cachar district in general can be classified into two groups namely (1) Reserved Forest and (2) Unclassed State Forest. An unclassed state forest is, however, simply a Government waste land and does not necessarily possess any of the characteristics which are usually associated with the expression forest.

Most of the forests are concentrated in the north, east and south ends of the district and practically form a continuous belt of varying depth comparatively narrower to the south and east but very much deeper in the north.

The forests are generally evergreen in type and contain a host of tree species. The important trees from the commercial point of view are Sundis, Til, Champa, Gomari, Sam, Nageswar, Jam, Jarul, Garjan, Simul etc. The forests of Cachar are richly stocked with bamboos of various species occuring over wide expanses on both hills and valleys. The important species of economic value are Muli, Dom, Khang, Kaligoda and Pecha. The Muli and Dom have great commercial importance, the former for constructional and fencing purposes and the latter for mat industry.

The total area under Reserved forest in the district in 1979-80 is recorded as 246,681 hectares and that under Unclassed State Forest is 32,393 hectares. Proposed Reserved Forest during this period is 2,756 hectares. The out-turn of timber and fuel from the forests of Cachar during 1979-80 is as shown below:

(a) Timber in rough logs	23,434	cubic metres.
(b) Timber in rough poles	3,535	running metres

The revenue yielded to the state exchequer through sales of forest products of the district during the above mentioned period is **Rs.4,017,871.59.**

A BRIEF NOTE ON PLACES OF RELIGIOUS, HISTORICAL OR ARCHAEOLOGICAL IMPORTANCE IN THE DISTRICT

The district of Cachar contains a few remains of religious, historical or archaeological interest. A brief note of the remains as collected from the writings of Late R.M. Nath and other sources is given below :

1. Siddheswar Shiva Temple : On the left bank of the river Barak, about a furlong to the east of the Badarpurghat Railway Station there is an old shrine dedicated to Lord Shiva. There is a stone image of Lord Shiva in the form of Lingam and some other deities. The shrine of Shiva's consort Parvati which is always an adjunct to a Shiva temple, stands on a high hillock on the south of the railway line. The temple which was built about two hundred years ago has of late been improved and renovated. According to tradition the main lingam is of touch-stone installed by a saint named Kapila, the author of the Sankhya Philosophy. The shrine thus derives the name Kapila-Ashram. Another tradition says that the shrine was installed by a local ChiefPura Raja who was a vassal either of the Tipperah King or of Lokenath, a governor of the Joytinga-Varsta under the suzerainity of the Tipperah King.

2. Sivatilla : About a mile to the south of Sonai, there is a hillock called 'Sivatilla'. On this hillock there is a Siva temple established by Kachari King Gobinda Chandra. A big crowd assemble here on the occasions of Sivaratri and Gosthastami.

3. Khaspur : A large area, containing ruins of brick-built two storied palace, temples of Rana Chandi and Vishnu and a large number of tanks, is located about 13 miles north-east of Silchar town. But, these are of comparativley recent date and possess little architectural merit. The temple Rana Chandi is still visited by devotees.

4. Lakhi Tillah : A small hillock about 9 miles to the south west of the Silchar town on the Srikona road contains ruins of a stonebuilt temple with a lot of carved stones and broken images of various deities believed to have been constructed by the Kachari King Lakshmi Chandra (1772-1780 AD) who was a great builder. This place is locally known as Lakhi tillah.

5. Bhairab Bari : About 12 miles west of Lakhipur town established by King Lakshmi Chandra—is a shrine of Lord Siva on a hillock about 150 ft. high.

6. Bhuban Hill : Located at a distance of about 29 miles to the south of Silchar town there are stone images of Siva and Durga believed to be of medieval age—built on the top of the hill. A large number of devotees visit this place on the occasion of Sivaratri and Baruni.

7. Narsingh Akhra : In the heart of the Silchar town in Narsingh tola, there is an old temple established in about 1846 A.D. by a saint named Bhagavan Das Ramayati hailing from Ayodhya (Oudh) of Uttar Pradesh.

There are several other 'akhras' or Vaishnava Shrines in the Silchar town established by the Bengalees who settled in the town during the early British period. In the shrine of Madan Mohan Jiu Tarapur there is a beautiful stone image of Hanuman—said to have been collected from Bhuban Hills.

8. Bishnupur Shiva : About a mile to the south-west of Lalabazar, 12 miles south of Hailakandi town is found an ancient Shiva-linga of black stone scaled on a well-carved pedestal. The carving and shape of the pedestal indicate its association with the Pala period (10th Century A.D.)

9. Imam Mehdi Mokam : It is a grave of a Mohammedan hero located in the village Bandasil on the left bank of Barak river about a mile below Badarpur, near Tiltikar village.

10. Khaki Pir's Mokam : In the Deorail village about a mile to the west of the Badarpur Railway Station, on the main road leading to Karimganj town, stands the grave of Pir Adom Khaki—a companion of the famous Pirshah Jelal.

11. Shah Arpin's Mokam : About a mile and half above the Badarpur T. E. in the Saraspur hill range there is a Shrine containing the grave of a Mohammedan saint named Shah Arpin, regarded as a holy place.

12. Langar-Shah Mokam : At Fulertal, about two miles north west of Lakhipur, there is a shrine of a Mohammedan Pir named Langar Shah. His grave is preserved with great care and veneration. The name of the Pir is derived from Langar or a big iron chain he used to wear around his waist. The chain is preserved near the grave as a sacred relic.

13. Narayan-Dahar : About 5 miles upstream of Fulertal in the middle of the river Barak is an island very much resembling the peacock island in the Brahmaputra near Gauhati. This is an ancient shrine said to have been established by a king of Manipur and it contains an image of God Vishnu under a shed.

PLACES OF TOURISTS' INTEREST IN THE TOWNS OF THE DISTRICT

The towns in Cachar district in general do not possess any remarkable feature which can draw the attention of the tourists. However, a few temples or shrines in and around Silchar town attract quite a few visitors. In the Malugram Ward of Silchar town, there is a massive and high brick-built temple of Lord Shiva constructed about a hundred years ago by a Sanyasin of the Giri order which forms a place of tourists' interest. An old temple established around 1846 A.D. in the heart of the town also draws visitors.

The natural scenary in the entire district especially in the portions bordering Meghalaya and Mizoram is superb and catches the eyes of the visitors easily.

A BRIEF ANALYSIS OF THE DATA ON VILLAGE DIRECTORY

The data as presented in Table 1 indicate that Cachar district has a total of 2,482 villages in 1981 as against 2,464 obtained during 1971 Census. 2,006 accounting for 80.82% of the total villages have one or more types of educational institutions ranging from a Primary School to a college. Facilities for receiving medical treatment is available in 331 villages only which constitute a meagre 13.34% of the total number of villages in Cachar. Drinking water, having a wide variety of sources is available in all the villages in the district. Amongst the other amenities, facilities of communication either by road or railway or waterways is available in 966 villages which account for 38.92% of the total no. of villages in Cachar. 686 or 27.64% of the villages hold weekly or bi-weekly or fortnightly market. 563 or 22.68% of the villages can be approached by pucca road. Almost an equal percentage of villages have facilities of post and telegraph offices (17.53) and power supply (16.72).

A look at the availability of different types of amenities in the police stations of the district reveals that the highest percentage (99.04) of villages having educational facilities is recorded against Udarbond P.S. and the lowest (66.67%) in Katlichara P.S. Udarbond P.S. having 25.96% of its villages where facilities for medical treatment are available, again tops the list and Sonai P.S. registers the lowest percentage (5.45) closely followed by Katlichara P.S. (5.67%) having such villages. Drinking water having a wide variety of sources is available in 100% of the villages in the district. Lala P.S. and Badarpur P.S. register the highest (38.46%) and the lowest (6.43%) percentage of villages having facilities of postal/telegraphic communication. The proportion of villages having weekly/bi-weekly/fortnightly hats/markets varies widely between 9.93% in case of Katlichara P.S. and 89.38% in Hailakandi P.S. The highest proportion of villages where facilities of communication either by road or railways or waterways are available, is observed in Udarbond P.S. (95.19%) and the lowest in Sonai P.S. (5.45%). Lala P.S. registers the highest percentage (46.15) of villages that can be approached by pucca road as against the lowest proportion (9.38%) of such villages found in Lakhipur P.S. As stated earlier the proportion of villages having electricity is the second lowest (16.72%) which comes next only to those having facilities for medical treatment (13.34%) in the district as a whole. Taking into account the position as obtained in the individual police stations it is found that less than 1% of the total villages in Dholai and Sonai police stations have power supply. Almost an equal proportion of villages in Katlichara (9.22%), Patharkandi (9.48%) and Lakhipur (9.82%) P.S. is reportedly having power supply. Barkhola P.S. registers the highest percentage (30.85%) of electrified villages closely followed by Silchar P.S. with 29.21% of its villages having power supply.

It is thus seen that much remains to be done in providing the essential facilities of medical treatment and power supply to the villages of Cachar district. Facilities of postal and telegraphic communication as available in the villages of the district also present a dismal picture.

TABLE 1: Distribution of Villages According to the Availability of Different Amenities

Sl. No.	Name of Police station	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking water	Post & telegraph	Market, Hat	Communications	Approach by pucca road	power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1	Katigora	184	170 (92.39)	18 (9.78)	184 (100.00)	30 (16.30)	30 (16.30)	12 (6.52)	26 (14.13)	20 (10.87)
2	Barkhola	94	81 (86.17)	14 (14.89)	94 (100.00)	20 (21.28)	23 (24.47)	21 (22.34)	11 (11.70)	29 (30.85)
3	Udarbond	104	103 (99.04)	27 (25.96)	104 (100.00)	21 (20.19)	63 (60.58)	99 (95.19)	28 (26 92)	22 (21.15)
4	Lakhipur	224	156 (69.64)	31 (13.84)	224 (100.00)	32 (14.29)	30 (13.39)	42 (18.75)	21 (9.38)	22 (9.82)
5	Silchar	202	168 (83.17)	25 (12.38)	202 (100.00)	54 (26.73)	46 (22.77)	108 (53.47)	74 (36.63)	59 (29.21)
6	Dholai	101	92 (91.09)	11 (10.89)	101 (100.00)	24 (23.76)	41 (40.59)	25 (24.75)	22 (21 78)	1 (0.99)
7	Sonai	110	87 (79.09)	6 (5.45)	110 (100.00)	21 (19.09)	23 (20.91)	6 (5.45)	32 (29.09)	1 (0.91)
8	Karimganj	324	246 (75.93)	44 (13.58)	324 (100.00)	37 (11.42)	40 (12.35)	160 (49.38)	54 (16.67)	65 (20.06)
9	Badarpur	140	105 (75.00)	19 (13.57)	140 (100.00)	9 (6.43)	24 (17.14)	108 (77.14)	51 (36.43)	32 (22.86)
10	Patharkandi	306	233 (76.14)	35 (11.44)	306 (100.00)	36 (11.76)	122 (39.87)	33 (10.78)	76 (24.84)	29 (9.48)
11	Ratabari	301	225 (74.75)	60 (19.93)	301 (100.00)	60 (19.93)	64 (21.26)	183 (60.80)	37 (12.29)	57 (18.94)
12	Hailakandi	160	157 (98.13)	18 (11.25)	160 (100.00)	41 (25.63)	143 (89.38)	46 (28.75)	60 (37 50)	41 (25.63)
13	Lala	91	89 (97.80)	15 (16.48)	91 (100.00)	35 (38.46)	23 (25.27)	69 (75.82)	42 (46.15)	24 (26.37)
14	Katlichara	141	94 (66.67)	8 (5.67)	141 (100.00)	15 (10.64)	14 (9.93)	54 (38.30)	29 (20.57)	13 (9.22)
	Total-District	2482	2006 (80.82)	331 (13.34)	2842 (100.00)	435 (17.53)	686 (27.64)	966 (38.92)	563 (22.68)	415 (16.72)

Table 2 :—Gives figures of villages not having facilities of education, medical treatment, post and telegraph office, markets or hats and communication either by road, rail or waterways alongside providing information about the distance range from those villages where those amenities are available.

It is observed that a total of 476 villages constituting 19.18% of the total villages in the district do not have any educational institution within their periphery. However, the inhabitants of almost the entire lot of such villages can avail of themselves the facility of educational institutions situated within a distance of less than five kilometres.

Facilities for medical treatment, considered to be an essential necessity for mankind, are not available in 2,151 (86.66%) villages in Cachar. But, medical institutions of some kind or other are located within a radius of five kilometres in case of 1,380 or 64.16% of such villages and people of 667 villages (31.01%) have to traverse a distance of 5 to 10 kms. to receive any kind of medical treatment.

Though 2,047 or 82.47% of the villages in the district do not have any post or telegraph office, 1,508 accounting for 73.67% of such villages have such facilities within a distance of below 5 kms. and inhabitants of only 4.30% of such villages have postal/telegraphic communication facilities available at a distance of 10kms. or beyond.

A great majority (76.11%) out of a total of 1,796 villages without any market / hat have facility of buying/selling sundries within a distance of less than five kms.

The facility of communication by road/rail/waterways is not available in 61.08% of the villages in the district. However, 1,204 or 79.42% of such villages have communication facilities available within a distance of below five kms. and only 3.03% of such villages have communication facilities located at a distance of ten kms. and above.

It is thus seen that through certain basic amenities are still not available within the boundary of a vast majority of villages in Cachar district, the population inhabiting in these villages can derive benefits from the amenities available in the neighbouring villages located at a distance of less than 5 kms. A noteworthy feature is that drinking water, drawn from various sources, is available in each and every village of the district.

TABLE 2: Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Village not having the amenity of	Number of villages where the amenity is not available and available at distance of.			
	0-5 Kms.	5-10-Kms.	10+Kms.	Total
(1)	(2)	(3)	(4)	(5)
1. Education	457	19	—	476
2. Medical	1380	667	104	2151
3. Drinking water	—	—	—	—
4. Post & Telegraph	1508	451	88	2047
5. Market/Hat	1367	369	60	1796
6. Communication	1204	266	46	1516

Table 3 : which gives us distribution of villages according to the distance from the nearest town and availability of different amenities reveals that majority (54.15%) of the villages in the district is located at a distance range of 16-50 kms. from an urban centre. Only 243 villages constituting 9.79% of the total villages have urban centre at a distance of less than 5 kms.

It is ovserved that nearer the distance of village from an urban centre more is the proportion of villages having various amenities with the exception of villages having facilities of medical institution and markets/ hats. Thus it is seen that 86.01% of villages located within a distance of less than 5 kms. from an urban centre have an educational institution as against 67.97% in case of those villages located at a distance of 51 kms. and above from an urban area. This difference is largest in case of villages having power supply where we find that a meagre 1.31% of the villages located at a distance of 51 kms. and above from urban areas have got electricity whereas as high as 40.74% of the village within a distance of less than 5 kms. from an urban centre have power supply. The proportion of villages approachable by pucca road is 44.86% in case of those villages which are within a distance of less than 5 kms. from any urban area as against 6.54% only in case of villages situated more than 50 kms. away from any town. The facilities of post and telegraph offices is also available to a much higher proportion of villages nearest to urban areas.

The above analysis corraborates the experience that the rural areas which are within a close proximity to urban centres are generally in a happier position by virtue of their having the facilities that are available in the urban areas.

TABLE 3 : Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in km.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	post & telegraph	Market/ Hat	Communication	Approach by pucca road.	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
0— 5	243	209 (86.01)	30 (12.35)	243 (100.00)	55 (22.63)	64 (26.34)	131 (53.91)	109 (44.86)	99 (40.74)
6—15	742	627 (84.50)	100 (13.48)	742 (100.00)	149 (20.08)	234 (31.54)	329 (44.34)	195 (26.28)	140 (18.87)
16—50	1344	1066 (79.32)	185 (13.76)	1344 (100.00)	221 (16.44)	337 (25.07)	455 (33.85)	249 (18.53)	174 (12.95)
51 +	153	104 (67.97)	16 (10.46)	153 (100.00)	10 (6.54)	51 (33.33)	51 (33.33)	10 (6.54)	2 (1.31)
Unspecified	..	..	..	..	..	..	..	..	..
Total	2482	2006 (80.82)	331 (13.34)	2482 (100.00)	435 (17.53)	686 (27.64)	966 (38.92)	563 (22.68)	415 (16.72)

TABLE 4 : Main staple food in the majority of villages in each police station

Sl.No.	Name of Police Station	Main Staple Food
1	Katigora	Rice
2	Barkhola	Rice
3	Udarbond	Rice
4	Lakhipur	Rice
5	Silchar	Rice
6	Dholai	Rice
7	Sonai	Rice
8	Karimganj	Rice
9	Badarpur	Rice
10	Patharkandi	Rice
11	Ratabari	Rice
12	Hailakandi	Rice
13	Lala	Rice
14	Katlichara	Rice

The table above indicates that rice forms the main element of food taken by the people in majority of villages in Cachar district. As a matter of fact rice is taken as main staple food by the vast populace throughout the length and breadth of rural as well as urban areas of the district.

TABLE 5 : This table provides us with the distribution of villages according to land use. It is found that 67.95% of the rural areas of the district are cultivable areas. Patharkandi Police station claims the highest (82.51%) proportion of such land closely followed by Hailakandi Police station with 80.83% of its area considered as cultivable. The minimum proportion (42.06%) of cultivable area to total area is obtained in case of Katlichara police station.

The proportion of irrigated area to total cultivable area is a meagre 0.76% in the district as a whole. Ratabari police station with 3.30% of its cultivable area irrigated stands first. A distressingly low proportion of irrigated area is obtained in 7 other police stations and in as many as 6 out of 14 police stations in Cachar district no cultivable land is reportedly irrigated.

It needs to be added here that despite our best efforts no information about source of irrigation could be collected by us and as such the figures of that irrigated area only, wherever it occurs, has been shown.

TABLE 5 : **Distribution of Villages according to Land Use**

Sl. No.	Name of police station	No. of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1	Katigora	184	34,830.42	70.12	..
2	Barkhola	94	29,810.45	64.37	..
3	Udarbond	104	33,153.31	69.66	0.95
4	Lakhipur	224	58,591.73	58.93	1.53
5	Silchar	202	56,665.26	64.74	0.12
6	Dholai	101	38,782.79	67.26	0.02

12	Hailakandi	160	33,274.04	80.83	1.34
13	Lala	91	32,637.45	74.08	.
14	Katlichara	141	45,752 23	42.06	..
	Total District	2,482	558,475.70	67.95	0.76

A BRIEF ANALYSIS OF THE TOWN DIRECTORY

The history and scope of Town Directory have already beenexplained. We shall now look at the different statements depicting different aspects of the towns in the district and shall attempt a brief analysis of the data presented in the Statements.

Statement I : Status and Growth History :

Absence of 1981 Census data necessitated deletion of a vital aspect of demographic information namely the density of population in the towns of the district. However, this statement reveals that the area altogether 7 towns in Cachar district as against 8 in 1971 since Ramkrishnanagar treated as town for the first time in 1971 Census has failed to fulfil the criteria laid for a place to be treated as urban area. Lala which was treated as town for the purpose of censuses in 1961 and 1971 has since been notified by the State Government as a regular town and it is now administered by a Town Committee Badarpur Railway Town treated as such for the first time in 1961 census still continues to be treated as a census town only. The largest area of 13.25 sq. kms. is found in case of Silchar town and the smallest of 0. 2 sq. kms. in case of Badarpur Railway town.

Statement II : Physical Aspects and Location of Towns : This statement indicates that the state capital Gauhati is almost equi-distant from all towns of Cachar district. The distance of district headquarter Silchar from other towns varies between 31 kms. and 66 Kms. Further, it is observed that excepting Lakhipur all other towns have railway station within their precinct.

Statement III : Municipal Finance--1978-79 : The data as collected from the respective Municipal Boards and Town Committees relating to the financial year 1978-79 show that excepting Badarpur and Karimganj the remaining towns of the district registered an excess of receipt over their expenditure during 1978-79, Lakhipur having shown the highest difference. It is observed that receipt through taxes etc. constitute about 50 per cent of the total receipts in case of Badarpur, Hailakandi and Karimganj towns and Government grant account for almost half of total receipts in case of Lakhipur and Lala towns. In case of Silchar town however the largest chunk of receipt is by way of loans obtained from the Government.

The expenditure pattern reveals that the highest (53.40%) and the lowest (9.49%) proportion of expenses for general administration was incurred by the Badarpur T. C. and Silchar Municipality respectively. Proportion of money spent for purposes of public health and other conveniences was highest (40.88%) in case of Karimganj and lowest (8.59%) in case of Lala town. Badarpur T. C., Karimganj Municipality and Lakhipur T. C. spent almost equal proportion (19.37%, 18.76% and 22.28% respectively) of their total expenditure for public works.

Statement IV : Civic and other Amenities, 1979 : Any discussion on the quantum of civic and other amenities available in a town need essentially be linked with the total number of inhabitants in it. Absence of population figures in column 4 of the statement therefore renders meaningless analysis of the other informations provided in the statement. However, it is observed that Silchar, being the district headquarter town has the longest length (14.32 kms.) of pucca road. Hailakandi registers the longest (41 57 kms.) length of kutcha roads. Lakhipur Town- though not the smallest in area, registers the lowest length of both pucca and kutcha roads. Lakhipur and Lala towns have no fire fighting brigade of their own and thus have to depend on the services of the fire-brigade station at Silchar (35 kms.) and Hailakandi (19 kms.) respectively.

Statement V : Medical, Educational, Recreational and Cultural Facilities 1979; The statement reveals that Silchar town has the privilege of having a medical college, an engineering college and a polytechnic institute which benefits the inhabitants of the entire district. Badarpur is the only town which does not have a hospital with facilities for keeping indoor patients.

Statement VI : Trade, Commerce, Industry and Banking, 1979 : The Statement shows that Badarpur Railway town manufactures no important commodity and as such has nothing to export. Rice, salt, mustard oil, pulses and kerosine mostly constitute the main items imported by the towns of the district. Bamboos, cane, cotton and egg are mostly the important articles exported by the 6 towns of Cachar district. Tea, bamboo products, soap, handloom cloth and ice-cream are the principal items manufactured in the towns of the district. Silchar, by virtue of its being the district headquarter town has the higher number 17) of banks than any other town of the district possess.

Table 6 below gives us an account of the most important single commodity manufactured, exported and imported in the towns of Cachar district. It is observed that except tea no major item of commercial importance is manufactured in or exported by any one town of the district. Kerosine oil constitute the most important article imported by two towns while rice is the main article imported by two others.

TABLE 6 : Most important commodity manufactured, imported and exported in towns

Name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
(1)	(2)	(3)	(4)
1. Badarpur T.C.	Biscuits	Egg	Rice
2. Badarpur Railway Town C.T.	..	..	Rice
3. Hailakandi M.B.	Handloom cloth	Handloom cloth	Kerosine oil
4. Karimganj M.B.	Soap	Split bamboo	Kerosine oil
5. Lakhipur T.C	Furniture	Pineapple	Salt
6. Lala T.C.	Spices	Forest products	All essential commodities
7. Silchar M.B.	Tea	Tea	Fuel

SECTION I

VILLAGE DIRECTORY

Note explaining the codes used in the Village Directory

To facilitate presentation of data in the District Census Handbook some codes have been used against the amenities available in the villages. These are explained below :

Column—5 :	P	Primary or Elementary school
	M	Junior Secondary or Middle school
	H	Matriculation or Secondary
	PUC	Higher Secondary/Intermediate/Pre-University/Junior College
	C	College
	I	Industrial School
	Tr	Training School
	AC	Adult Literacy class/centre
	O	Other educational institutions
Column— 6 :	H	Hospital
	MH	Maternity Home
	CWC	Child Welfare Centre
	HC	Health Centre
	PHC	Primary Health Centre
	PHS	Primary Health Sub-Centre
	D	Dispensary
	FPC	Family Planning Centre
	TB	T. B. Clinic
	NH	Nursing Home
	RP	Registered private practitioner
	SMP	Subsidised medical practitioner
	CHW	Community health workers
	O	Others
Column—7 :	T	Tap
	W	Well
	TK	Tank
	TW	Tubewell
	HP	Handpump
	R	River
	F	Fountair
	C	Canal
	L	Lake
	S	Spring
	N	Nallah
	O	Others
Column—8 :	PO	Post Office
	TO	Telegraph Office
	PTO	Post and Tlegraph Office
	Phone	Telephone coennection
Column—10 :	BS	Bus
	RS	Railway Station
	NW	Navigable waterway
Column—11 :	PR	Pucca Road
	KPR	Kutcha Road
	NR	Navigable river
	NC	Navigable canal
	NW	Navigable waterway
Column—13 :	ED	Electricity for domestic purpose
	EAG	Electricity for agriculture
	EO	Electricity for other purpose
	EA	Electricity for all purpose
Column—20 :	N	Copies of newspapers coming into the village
	M	Motorcycles/Scooters available in the village
	C	Cars/Jeeps available in the village
	T	Tractors available in the village
